

Soil & Plant Science

CONTENTS

ORIGINAL ARTICLES

- 391 Nutrient supplementation increased growth and nitrate concentration of lettuce cultivated hydroponically with biogas slurry
W.K. Liu, Q.C. Yang, L.F. Du, R.F. Cheng and W.L. Zhou
- 395 Reduced trigonelline accumulation due to rhizobial activity improves grain yield in peanut (*Arachis hypogaea* L.)
Y. Cho, E. Kodjoe, N. Puppala and A.J. Wood
- 404 Succinic acid inhibited growth and pathogenicity of *in vitro* soil-borne fungus *Fusarium oxysporum* f. sp. *niveum*
H.-S. Wu, Y.-D. Liu, G.-M. Zhao, X.-Q. Chen, X.-N. Yang and X.-D. Zhou
- 410 Effects of split nitrogen fertilization on post-anthesis photoassimilates, nitrogen use efficiency and grain yield in malting barley
J. Cai, D. Jiang, F. Liu, T. Dai and W. Cao
- 421 Performance of spring barley varieties and variety mixtures as affected by manure application and their order in an organic crop rotation
M. Askegaard, I.K. Thomsen, J. Berntsen, M.S. Hovmøller and K. Kristensen
- 431 Intense fragmentation and deep burial reduce emergence of *Rumex crispus* L.
A. Pye, L. Andersson and H. Fogelfors
- 438 Properties of soils from the Swedish long-term fertility experiments: VI. Mapping soil electrical conductivity with different geophysical methods
E. Lück, J. Ruehlmann and H. Kirchmann
- 448 How does soil fertility affect yam growth?
L.N. Diby, V.K. Hgaza, T.B. Tié, A. Assa, R. Carsky, O. Girardin, U.R. Sangakkara and E. Frossard
- 458 Effects of seedbed properties on crop emergence: 1. Temporal effects of temperature and sowing depth in seedbeds with favourable properties
I. Håkansson, J. Arvidsson, T. Keller and T. Rydberg
- 469 Effects of seedbed properties on crop emergence: 2. Effects of aggregate size, sowing depth and initial water content under dry weather conditions
I. Håkansson, J. Arvidsson and T. Rydberg

SHORT COMMUNICATION

- 480 Host plant suitability, population dynamics and parasitoids of the horse chestnut leafminer *Cameraria ohridella* (Lepidoptera: Gracillariidae) in southern Sweden
B. Rämert, M. Kenis, E. Kärnestam, M. Nyström and L.-M. Rännbäck
