

CONTENTS

Research Reports

- Evaluation of a mixture of carvacrol, cinnamaldehyde, and capsicum oleoresin for improving growth performance and metabolizable energy in broiler chicks fed corn and soybean meal**
D. Bravo, P. Utterback, and C. M. Parsons 115
- Effects of nonantibiotic feed additives on performance, nutrient retention, gut pH, and intestinal morphology of broilers fed different levels of energy**
M. Houshmand, K. Azhar, I. Zulkifli, M. H. Bejo, and A. Kamyab 121
- Effect of incremental dietary levels of red blood cells on growth performance of broilers**
E. D. Frugé, S. Powell, T. D. Bidner, and L. L. Southern 129
- The efficacy of a phytase enzyme fed to Hy-Line W-36 laying hens from 32 to 62 weeks of age**
E. Meyer and C. Parsons 136
- Effects of coccidiosis control programs on antibody levels against selected pathogens and serum nitric oxide levels in broiler chickens**
K. W. Lee, H. S. Lillehoj, S. I. Jang, G. X. Li, D. A. Bautista, K. Phillips, D. Ritter, E. P. Lillehoj, and G. R. Siragusa 143
- Effect of diet and phytase on the performance and tibia ash of broilers exposed to a live coccidia oocyst vaccine**
C. L. Walk, C. L. Wyatt, R. Upton, and A. P. McElroy 153
- Nutritional and feeding value of crude glycerin for poultry. 1. Nutritional value of crude glycerin**
B. Jung and A. B. Batal 162
- In-house windrowing of a commercial broiler farm during the summer months and its effect on litter composition**
K. J. Barker, C. D. Coufal, J. L. Purswell, J. D. Davis, H. M. Parker, M. T. Kidd, C. D. McDaniel, and A. S. Kiess 168
- The effects of feeding various levels of nonphytate phosphorus in the starter phase on broiler growth performance and bone characteristics in subsequent phases**
S. Powell, T. D. Bidner, and L. L. Southern 181
- Bone measurements of molted layers fed low-salt corn and soybean meal diets containing safflower meal or tomato pomace**
D. S. Patwardhan, A. J. King, A. M. Oberbauer, and T. B. Holland 190

Variations on standard broiler processing in an effort to reduce <i>Campylobacter</i> numbers on postpick carcasses	
M. E. Berrang, D. P. Smith, and R. J. Meinersmann	197
The effect of copper in excess of the requirement during the starter period on subsequent performance of broiler chicks	
A. Karimi, Gh. Sadeghi, and A. Vaziry	203
The potential of vegetative buffers to reduce dust and respiratory virus transmission from commercial poultry farms	
H. K. Burley, A. Adrizal, P. H. Patterson, R. M. Hulet, H. Lu, R. M. Bates, G. P. Martin, C. A. B. Myers, and H. M. Atkins	210
Infectious laryngotracheitis vaccine virus detection in water lines and effectiveness of sanitizers for inactivating the virus	
S. Ou, J. J. Giambrone, and K. S. Macklin	223
Examining the relationships between pellet quality, broiler performance, and bird sex	
K. G. S. Lilly, C. K. Gehring, K. R. Beaman, P. J. Turk, M. Sperow, and J. S. Moritz	231
Field Report	
Evaluation of surface-applied char on the reduction of ammonia volatilization from broiler litter	
C. W. Ritz, A. S. Tasistro, D. E. Kissel, and B. D. Fairchild	240
Book Review	246
