- Diallyl disulphide and lovastatin: effects on energy and protein utilisation in, as well as methane emission from, sheep  
*Fenja Klevenhusen, Stephane Duval, Johanna O. Zeitz, Michael Kreuzer and Carla R. Soliva* 255
- Evaluation of complementary effects of 9,10-anthraquinone and fumaric acid on methanogenesis and ruminal fermentation *in vitro*  
*Seyed Hadi Ebrahimi, Madhu Mohini, Kamal Kishore Singhal, Vahideh Heidarian Miri and Amrish Kumar Tyagi* 267
- Nitrogen excretion of adult sheep fed silages made of a mixed sward or of pure unfertilised grass alone and in combination with barley  
*Katharina Seip, Gerhard Breves, Johannes Isselstein and Hansjörg Abel* 278
- Effects of keratinase supplementation of corn-soybean meal based diets on apparent ileal amino acid digestibility in growing pigs and serum amino acids, cytokines, immunoglobulin levels and loin muscle area in nursery pigs  
*Ding Wang, Zhikai Zeng, Xiangshu Piao, Pengfei Li, Lingfeng Xue, Qian Zhang, Xu Han, Hongyu Zhang, Bing Dong and Sung Woo Kim* 290
- Determination of energy and amino acid digestibility in growing pigs fed corn distillers' dried grains with solubles containing different lipid levels  
*Ping Ren, Zhengpeng Zhu, Bing Dong, Jianjun Zang and Limin Gong* 303
- Bioavailability of two organic forms of zinc in comparison to zinc sulphate for weaning pigs fed a diet composed mainly of wheat, barley and soybean meal  
*Brigitte R. Paulicks, Hanna Ingenkamp and Klaus Eder* 320
- Effects of dietary lipids and *Clostridium butyricum* on the performance and the digestive tract of broiler chickens  
*Bingkun Zhang, Xin Yang, Yuming Guo and Fangyu Long* 329
