

# Contents

- 523**  
*M. Jalali and S. S. Tabar* – Chemical fractionation of phosphorus in calcareous soils of Hamedan, western Iran under different land use
- 532**  
*R. Mills, H. Glanville, S. McGovern, B. Emmett, and D. L. Jones* – Soil respiration across three contrasting ecosystem types: comparison of two portable IRGA systems
- 536**  
*U. Schuler, P. Erbe, M. Zarei, W. Rangubpit, A. Surinkum, K. Stahr, and L. Herrmann* – A gamma-ray spectrometry approach to field separation of illuviation-type WRB reference soil groups in northern Thailand
- 545**  
*H. Pfab, I. Palmer, F. Buegger, S. Fiedler, T. Müller, and R. Ruser* – N<sub>2</sub>O fluxes from a Haplic Luvisol under intensive production of lettuce and cauliflower as affected by different N-fertilization strategies
- 554**  
*O. Spott, and C. F. Stange* – Formation of hybrid N<sub>2</sub>O in a suspended soil due to co-denitrification of NH<sub>2</sub>OH
- 568**  
*C. Brock, A. Fließbach, H.-R. Oberholzer, F. Schulz, K. Wiesinger, F. Reinecke, W. Koch, B. Pallutt, B. Dittman, J. Zimmer, K.-J. Hülsbergen, and G. Leithold* – Relation between soil organic matter and yield levels of nonlegume crops in organic and conventional farming systems
- 576**  
*S. Heumann, A. Schlichting, J. Böttcher, and P. Leinweber* – Sterols in soil organic matter in relation to nitrogen mineralization in sandy arable soils
- 587**  
*L. Godbersen, J. Utermann, W. H. M. Duijnsveld, S. Altfelder, G. Kuhn, and J. Böttcher* – Comparing concurrent *in situ* and batch-extracted trace element concentrations
- 596**  
*T. Scholten, C. Geißler, J. Goc, P. Kühn, and C. Wiegand* – A new splash cup to measure the kinetic energy of rainfall
- 602**  
*T. Krey, M. Caus, C. Baum, S. Ruppel, and B. Eichler-Löbermann* – Interactive effects of plant growth-promoting rhizobacteria and organic fertilization on P nutrition of *Zea mays* L. and *Brassica napus* L.
- 614**  
*U. Hammesfahr, R. Bierl, and S. Thiele-Bruhn* – Combined effects of the antibiotic sulfadiazine and liquid manure on the soil microbial-community structure and functions
- 624**  
*M. Ryzak and A. Bieganowski* – Methodological aspects of determining soil particle-size distribution using the laser diffraction method
- 634**  
*A. Jacobs, M. Helfrich, J. Dyckmans, R. Rauber, and B. Ludwig* – Effects of residue location on soil organic matter turnover: results from an incubation experiment with <sup>15</sup>N-maize
- 644**  
*M. Loell, W. Reiher, and P. Felix-Henningsen* – Contents and bioavailability of rare earth elements in agricultural soils in Hesse (Germany)
- 655**  
*Y. Ma, L. Guo, H. Wang, B. Bai, and D. Shi* – Accumulation, distribution, and physiological contribution of oxalic acid and other solutes in an alkali-resistant forage plant, *Kochia sieversiana*, during adaptation to saline and alkaline conditions
- 664**  
*D. Püschel, J. Rydlová, R. Sudová, M. Gryndler, and M. Vosátka* – The potential of mycorrhizal inoculation and organic amendment to increase yields of *Galega orientalis* and *Helianthus tuberosus* in a spoil-bank substrate
- 673**  
*M. C. Fernández, F. H. Gutiérrez Boem, and G. Rubio* – Effect of indigenous mycorrhizal colonization on phosphorus-acquisition efficiency in soybean and sunflower
- 678**  
*K. Siegfried, H. Dietz, E. Schlecht, and A. Buerkert* – Nutrient and carbon balances in organic vegetable production on an irrigated, sandy soil in northern Oman
- 690**
