

Nutrient Cycling in Agroecosystems

Volume 91 · Number 1 · September 2011

**Yield response models to phosphorus application:
a research synthesis of Finnish field trials
to optimize fertilizer P use of cereals**

E. Valkama · R. Uusitalo · E. Turtola 1

**Selenium fractions in selenate-fertilized field
soils of Finland**

R. Keskinen · M. Rätty · M. Yli-Halla 17

**Effects of a catch crop and reduced nitrogen
fertilization on nitrogen leaching in greenhouse
vegetable production systems**

J. Min · W. Shi · G. Xing · H. Zhang · Z. Zhu 31

**Looking beyond fertilizer: assessing the
contribution of nitrogen from hydrologic
inputs and organic matter to plant growth
in the cranberry agroecosystem**

S.M. Stackpoole · K.R. Kosola · B.A.A. Workmaster ·
N.M. Guldan · B.A. Browne · R.D. Jackson 41

**Nitrogen budget and surface water nitrogen
load in Changshu: a case study in the Taihu
Lake region of China**

C. Ti · Y. Xia · J. Pan · G. Gu · X. Yan 55

**Grazing intensity effects on soil nitrogen
mineralization in semi-arid grassland
on the Loess Plateau of northern China**

T. Liu · Z. Nan · F. Hou 67

**Leaching losses of nitrate nitrogen and dissolved
organic nitrogen from a yearly two crops system,
wheat-maize, under monsoon situations**

M. Huang · T. Liang · Z. Ou-Yang · L. Wang ·
C. Zhang · C. Zhou 77

**Symbiotic nitrogen fixation by legumes
in two Chinese grasslands estimated with
the ¹⁵N dilution technique**

B. Yang · N. Qiao · X. Xu · H. Ouyang 91

**An analysis of farmers' use of phosphorus
fertiliser in industrial agriculture: a case study
in the Bordeaux region (south-western France)**

T. Nesme · S. Brunault · A. Mollier · S. Pellerin 99
