

## BEHAVIOUR, WELFARE, HUSBANDRY &amp; ENVIRONMENT

- Physiological responses of laying hens during whole-house killing with carbon dioxide.* D.E.F. McKeegan, N.H.C. Sparks, V. Sandilands, T.G.M. Demmers, P. Boulcott and C.M. Wathes 645

- Effect of different concentrations of Bacillus subtilis on growth performance, carcass quality, gut microflora and immune response of broiler chickens.* A.K. Molnár, B. Podmaniczky, P. Kürti, I. Tenk, R. Glávits, GY. Virág and ZS. Szabó 658

- Effect of low light and high noise on behavioural activity, physiological indicators of stress and production in laying hens.* E.A. O'Connor, M.O. Parker, E.L. Davey, H. Grist, R.C. Owen, B. Szladovits, T.G.M. Demmers, C.M. Wathes and S.M. Abeyesinghe 666

## GENETICS

- Genetics of hyperpigmentation associated with the Fibromelanosis gene (Fm) and analysis of growth and meat quality traits in crosses of native Indian Kadaknath chickens and non-indigenous breeds.* G. Arora, S.K. Mishra, B. Nautiyal, S.O. Pratap, A. Gupta, C.K. Beura and D.P. Singh 675

- Inheritance of plumage colour variations in a large flock of Japanese quail.* S.K. Mishra, A.A. Khan, Raj Narayan, S.P. Singh, S.O. Pratap, D. Saxena and D. Chaudhuri 686

## IMMUNOLOGY &amp; MICROBIOLOGY

- Effects of hydrolysed Saccharomyces cerevisiae yeast and yeast cell wall components on live performance, intestinal histo-morphology and humoral immune response of broilers.* N. Muthusamy, S. Haldar, T.K. Ghosh and M.R. Bedford 694

## NUTRITION

- Effect of dietary energy source on deposition and fatty acid synthesis in the liver of the laying hen.* J.W. Zhang, D.W. Chen, B. Yu and Y.M. Wang 704

- Effect of caprylic acid and Yucca schidigera extract on production performance, egg quality, blood characteristics, and excreta microflora in laying hens.* J.P. Wang and I.H. Kim 711

- Effects of dietary calcium content and vitamin D source on skeletal properties in growing turkeys.* M.R. Tatara, W. Krupski, M. Jankowski, Z. Zduńczyk, J. Jankowski and T. Studziński 718

- Effects of dietary energy concentration, nonstarch polysaccharide concentration, and particle sizes of nonstarch polysaccharides on digesta mean retention time and gut development in laying hens.* M.M. Van Krimpen, R.P. Kwakkel, C.M.C. Van Der Peet-Schwering, L.A. Den Hartog and M.W.A. Verstegen 730

- Effects of sex and inclusion of dried distillers grains with solubles on slaughter yield and meat characteristics of Pekin ducks.* M.P. Adamski, A.M. Kowalczyk, E.T. Łukaszewicz and M. Korzeniowska 742

- Omega-3 enriched egg production: the effect of  $\alpha$ -linolenic  $\omega$ -3 fatty acid sources on laying hen performance and yolk lipid content and fatty acid composition.* A. Antruejo, J.O. Azcona, P.T. Garcia, C. Gallinger, M. Rosmini, R. Ayerza, W. Coates and C.D. Perez 750

- The effect of dietary calcium concentration and particle size on performance, eggshell quality, bone mechanical properties and tibia mineral contents in moulted laying hens.* Y. Cufadar, O. Olgun and A.Ö. Yildiz 761

- Rice bran lysolecithin as a source of energy in broiler chicken diet.* M.V.L.N. Raju, S.V. Rama Rao, P.P. Chakrabarti, B.V.S.K. Rao, A.K. Panda, B.L.A. Prabhavathi Devi, V. Sujatha, J.R.C. Reddy, G. Shyam Sunder and R.B.N. Prasad 769

- Nutritional value of narrow-leaved lupin (Lupinus angustifolius) for broilers.* C. L. Nalle, V. Ravindran and G. Ravindran 775

## PHYSIOLOGY, BIOCHEMISTRY &amp; NEUROBIOLOGY

- Changes in plasma gonadotrophins, testosterone, prolactin, thyroxine and triiodothyronine concentrations in male Japanese quail (Coturnix coturnix japonica) of a heavy body weight line during photo-induced testicular growth and regression.* S.J. Henare, M. Kikuchi, R.T. Talbot and J.F. Cockrem 782

- Neurogenic inflammation in the upper digestive tract of the mule duck: effect of a chemical algogen and force-feeding.* J. Servière, M. Carriere, C. Duvaux-Ponter, G. Guy and S. Roussel 792

- Sex-based responses of plasma creatine kinase in broilers to thermoneutral constant and cyclic high temperatures.* X. Tao, H. Dong, H. Zhang and H. Xin 800
