

CONTENTS

RESEARCH PAPERS

- The application of *n*-butanol improves embryo and green plant production in anther culture of Australian wheat (*Triticum aestivum* L.) genotypes
Sue Broughton 813
- Variation for kernel number and related traits in triticale (x *Triticosecale* Wittmack)
Rosella Motzo, Simona Bassu, Francesco Giunta 823
- Radiation-use efficiency of irrigated biomass sorghum in a Mediterranean environment
Michele Rinaldi, Pasquale Garofalo 830
- Leaf development, radiation interception and radiation-use efficiency of kale crops supplied with different rates of banded or broadcast phosphorus fertiliser
E. Chakwizira, D. J. Moot, W. R. Scott, A. L. Fletcher, S. Maley 840
- Sucrose accumulation in sugarcane stalks does not limit photosynthesis and biomass production
N. G. Inman-Bamber, P. A. Jackson, M. Hewitt 848
- Analysis of genetic diversity, population structure and linkage disequilibrium in elite cotton (*Gossypium* L.) germplasm in India
Satya Narayan Jena, Anukool Srivastava, Uma Maheswar Singh, Sribash Roy, Nandita Banerjee, Krishan Mohan Rai, Sunil Kumar Singh, Verandra Kumar, Lal Babu Chaudhary, Joy Kumar Roy, Rakesh Tuli, Samir V. Sawant 859
- Response and adaptation of soybean systems to climate warming in Northeast China: insights gained from long-term field trials
H. F. Zheng, L. D. Chen, X. Z. Han 876
- Understand distribution of carbon dioxide to interpret crop growth data: Australian grains free-air carbon dioxide enrichment experiment
Mahabubur Mollah, Debra Partington, Genn Fitzgerald 883
- Molecular genetic marker-based analysis of species-differentiated phenotypic characters in an interspecific ryegrass mapping population
J. Wang, R. C. Baillie, N. O. I. Cogan, N. M. McFarlane, M. P. Dupal, K. F. Smith, J. W. Forster 892
- Symbiotic performance of Mediterranean *Trifolium* spp. with naturalised soil rhizobia
E. A. Drew, N. Charman, R. Dingemans, E. Hall, R. A. Ballard 903
