

Mitigation of Phosphorus Losses from Agriculture

- Preface**
T. Q. Zhang and D. K. Reid 313–316
- Context for re-evaluating agricultural source phosphorus loadings to the Great Lakes**
P. J. Joosse and D. B. Baker 317–327
- Soil controls of phosphorus in runoff: Management barriers and opportunities**
P. J. A. Kleinman, A. N. Sharpley, A. R. Buda, R. W. McDowell, and A. L. Allen 329–338
- Temporal patterns of soil phosphorus release to runoff during a rainfall event as influenced by soil properties and its effects on estimating soil P losses**
Y. T. Wang, T. Q. Zhang, Q. C. Hu, I. P. O'Halloran, C. S. Tan, and K. Reid 339–347
- Surface runoff and sub-surface drainage phosphorus losses under regular free drainage and controlled drainage with sub-irrigation systems in southern Ontario**
C. S. Tan and T. Q. Zhang 349–359
- Preferential pathways of phosphorus movement from agricultural land to water bodies in the Canadian Great Lakes basin: A predictive tool**
S. E. Allaire, E. van Bochove, J.-T. Denault, H. Dadfar, G. Thériault, A. Charles, R. De Jong 361–374
- Soil test phosphorus changes and phosphorus runoff losses in incubated soils treated with livestock manures and synthetic fertilizer**
D. Kumaragamage, D. Flaten, O. O. Akinremi, C. Sawka, and F. Zvomuya 375–384
- Grazing management effects on stream bank erosion and phosphorus delivery to a pasture stream**
S. L. Nellesen, J. L. Kovar, M. M. Haan, and J. R. Russell 385–395
- The inositol phosphates in soils and manures: Abundance, cycling, and measurement**
C. D. Giles, B. J. Cade-Menun, and J. E. Hill 397–416
- Processing tomato phosphorus utilization and post-harvest soil profile phosphorus as affected by phosphorus and potassium additions and drip irrigation**
K. Liu, T. Q. Zhang, and C. S. Tan 417–425
- Phosphorus and nitrogen loading depths in fluvial sediments following manure spill simulations**
S. D. Armstrong, D. R. Smith, P. R. Owens, B. C. Joern, A. B. Leytem, C. H. Huang, and O. Adeola 427–436
- Agricultural phosphorus balance trends in Ontario, Michigan and Ohio**
T. W. Bruulsema, R. W. Mullen, I. P. O'Halloran, and D. D. Warncke 437–442
- Temporal trends of risk of water contamination by phosphorus from agricultural land in the Great Lakes Watersheds of Canada**
E. van Bochove, J.-T. Denault, M.-L. Leclerc, G. Thériault, F. Dechmi, S. E. Allaire, A. N. Rousseau, and C. F. Drury 443–453
- A modified Ontario P index as a tool for on-farm phosphorus management**
D. K. Reid 455–466
- Evaluation methods for a combined research and extension program used to address starter phosphorus fertilizer use for corn in New York**
Q. M. Ketterings, K. J. Czymmek, and S. N. Swink 467–477
- Transport of phosphorus and nitrogen in surface runoff in a corn silage system: Paired watershed methodology and calibration period results**
W. E. Jokela and M. D. Casler 479–491
