Articles

- Studies on the effect of an *Enterococcus faecium* probiotic on T cell populations in peripheral blood and intestinal epithelium and on the susceptibility to *Salmonella* during a challenge infection with *Salmonella* Typhimurium in piglets
Hassan Mafamane, István Szabó, Michael F.G. Schmidt, Matthias Filter, Nicole Walk, Karsten Tedin and Lydia Scharek-Tedin 415
- Effect of a microencapsulated feed additive of lactic and formic acid on the prevalence of *Salmonella* in pigs arriving at the abattoir
Joseane Willamil, Eva Creus, J. Francisco Pérez, Enric Mateu and Susana M. Martín-Orúe 431
- Effect of different carbohydrates on *in vitro* fermentation activity and bacterial numbers of porcine inocula under osmotic stress conditions
Franziska Rink, Eva Bauer, Meike Eklund and Rainer Mosenthin 445
- Effects of high dietary fibre diets formulated from by-products from vegetable and agricultural industries on plasma metabolites in gestating sows
Christian Clement Yde, Hanne Christine Bertram, Peter Kappel Theil and Knud Erik Bach Knudsen 460
- Effect of different iron loads on serum and tissue biochemical parameters and liver hepcidin mRNA abundance of neonatal piglets
Mengyun Li, Qingqiang Yin, Xiaowei Dang, Juan Chang, Ruiyu Zuo and Qiuhong Zheng 477
- The influence of dietary sodium on bone development in growing rats
Li Lu, Qing Cheng, Jun Chen, Guozhu Yang, Chao Wan, Yanjiao Zhang and Qingnan Li 486
- Differences in portal flow rates of amino acids and liver composition between rats fed casein or lactalbumin
Luis A. Rubio 497
