

# Foodborne Pathogens and Disease

Volume 9

Number 9

September 2012

---

## ORIGINAL ARTICLES

---

- Development of a High-Resolution Melting–Based Approach for Efficient Differentiation Among *Bacillus cereus* Group Isolates** 777  
*V. Antolinos, P.S. Fernández, M. Ros-Chumillas, P.M. Periago, and J. Weiss*
- Biofilm Formation, Cell Surface Hydrophobicity, and Fatty Acids Analysis of Starved *Salmonella enterica* Serovar Typhimurium in Seawater** 786  
*R. Lagha, F.B. Abdallah, A. Ellafi, K. Békir, and A. Bakhrouf*
- Shiga Toxin Subtypes Associated with Shiga Toxin–Producing *Escherichia coli* Strains Isolated from Red Deer, Roe Deer, Chamois, and Ibex** 792  
*E. Hofer, N. Cernela, and R. Stephan*
- Clinical Features of Human Salmonellosis Caused by Bovine-Associated Subtypes in New York** 796  
*K.J. Cummings, L.D. Warnick, Y.T. Gröhn, K. Hoelzer, T.P. Root, J.D. Siler, S.M. McGuire, E.M. Wright, S.M. Zansky, and M. Wiedmann*
- Characterization of Extended-Spectrum Beta-Lactamase–Producing *Salmonella enterica* Serotype Brunei and Heidelberg at the Hussein Dey Hospital in Algiers (Algeria)** 803  
*R. Kermas, A. Touati, L. Brasme, E. Le Magrex-Debar, S. Mehrane, F.-X. Weill, and C. De Champs*
- Prevalence and Levels of *Bacillus cereus* Emetic Toxin in Rice Dishes Randomly Collected from Restaurants and Comparison with the Levels Measured in a Recent Foodborne Outbreak** 809  
*L. Delbrassinne, M. Andjelkovic, K. Dierick, S. Denayer, J. Mahillon, and J. Van Loco*
- Farm-Level Associations with the Shedding of *Salmonella* and Antimicrobial-Resistant *Salmonella* in U.S. Dairy Cattle** 815  
*G.G. Habing, J.E. Lombard, C.A. Koprak, D.A. Dargatz, and J.B. Kaneene*
- Antimicrobial Effects of Sodium Metasilicate Against *Listeria monocytogenes*** 822  
*C.S. Sharma, S.K. Williams, K.R. Schneider, R.H. Schmidt, and G.E. Rodrick*
- Inactivation of Human Norovirus Surrogates by Benzalkonium Chloride, Potassium Peroxymonosulfate, Tannic Acid, and Gallic Acid** 829  
*X. Su and D.H. D'Souza*

(continued)

<b>Prevalence of Foodborne Pathogens in Retailed Foods in Thailand</b> <i>C. Ananchaipattana, Y. Hosotani, S. Kawasaki, S. Pongsawat, B. Md. Latiful, S. Isobe, and Y. Inatsu</i>	835
<b>Antimicrobial-Resistant <i>Campylobacter</i> in the Food Chain in Mexico</b> <i>M.B. Zaidi, P.F. McDermott, F.D. Campos, R. Chim, M. Leon, G. Vazquez, G. Figueroa, E. Lopez, J. Contreras, and T. Estrada-Garcia</i>	841
<b>High Level of Heterogeneity Among <i>Listeria monocytogenes</i> Isolates from Clinical and Food Origin Specimens in Greece</b> <i>D.P. Houhoula, D. Peirasmaki, S.J. Konteles, D. Kizis, S. Koussissis, M. Bratacos, N. Poggas, E. Charvalos, A. Tsakris, and J. Papaparaskevas</i>	848
<b>Molecular Identification and Characterization of Ileal and Cecal Fungus Communities in Broilers Given Probiotics, Specific Essential Oil Blends, and Under Mixed <i>Eimeria</i> Infection</b> <i>M.E. Hume, C.A. Hernandez, N.A. Barbosa, N.K. Sakomura, S.E. Dowd, and E.O. Oviedo-Rondón</i>	853
<b>Development and Validation of a PulseNet Standardized Protocol for Subtyping Isolates of <i>Cronobacter</i> Species</b> <i>S.P. Brengi, S.B. O'Brien, M. Pichel, C. Iversen, M. Arduino, N. Binsztein, B. Jensen, F. Pagotto, E.M. Ribot, R. Stephan, N. Cernela, K. Cooper, and S. Fanning</i>	861
<b>LETTER TO THE EDITOR</b>	
<b>Case-Control Studies of Sporadic Enteric Infections Have Limited Usefulness in Evaluating Key Foodborne Disease Risk Factors</b> <i>C.W. Hedberg</i>	868
