Review

- 821 *T. J. Centner and S. Ferreira*
Ability of governments to take actions to confront incursions of diseases - a case study: citrus canker in Florida

Original Articles

- 829 *C. H. Bock, A. Z. Cook, P. E. Parker, T. R. Gottwald and J. H. Graham*
Short-distance dispersal of splashed bacteria of *Xanthomonas citri* subsp. *citri* from canker-infected grapefruit tree canopies in turbulent wind
- 837 *Y. He and G. P. Munkvold*
Comparison of extraction procedures for detection of *Xanthomonas axonopodis* pv. *phaseoli* in common bean seed
- 844 *A. Ramsubhag, D. Lawrence, D. Cassie, R. Fraser, P. Umaharan, P. Prior and E. Wicker*
Wide genetic diversity of *Ralstonia solanacearum* strains affecting tomato in Trinidad, West Indies
- 858 *M. Faize, L. Burgos, L. Faize, C. Petri, G. Barba-Espin, P. Díaz-Vivancos, M. J. Clemente-Moreno, N. Alburquerque and J. A. Hernandez*
Modulation of tobacco bacterial disease resistance using cytosolic ascorbate peroxidase and Cu, Zn-superoxide dismutase
- 867 *A. K. Lees, L. Sullivan, J. S. Lynott and D. W. Cullen*
Development of a quantitative real-time PCR assay for *Phytophthora infestans* and its applicability to leaf, tuber and soil samples
- 877 *M. L. Vélez, P. V. Silva, O. A. Troncoso and A. G. Greslebin*
Alteration of physiological parameters of *Austrocedrus chilensis* by the pathogen *Phytophthora austrocedrae*
- 889 *C. Husson, O. Caël, J. P. Grandjean, L. M. Nageleisen and B. Marçais*
Occurrence of *Hymenoscyphus pseudoalbidus* on infected ash logs
- 896 *E. K. Dann, A. W. Cooke, L. I. Forsberg, K. G. Pegg, Y.-P. Tan and R. G. Shivas*
Pathogenicity studies in avocado with three necrotrophic fungi, *Calonectria ilicicola*, *Gliocladiopsis* sp. and *Ilyonectria liriodendri*
- 903 *C. V. Castell-Miller and D. A. Samac*
Population genetic structure, gene flow and recombination of *Cochliobolus miyabeanus* on cultivated wildrice (*Zizania palustris*)
- 915 *V. Caffier, B. Le Cam, P. Expert, M. Tellier, M. Devaux, M. Giraud and M. Chevalier*
A new scab-like disease on apple caused by the formerly saprotrophic fungus *Venturia asperata*
- 925 *P. Horevaj, G. Brown-Guedira and E. A. Milus*
Resistance in winter wheat lines to deoxynivalenol applied into florets at flowering stage and tolerance to phytotoxic effects on yield
- 934 *S. J. Marcroft, A. P. Van de Wouw, P. A. Salisbury, T. D. Potter and B. J. Howlett*
Effect of rotation of canola (*Brassica napus*) cultivars with different complements of blackleg resistance genes on disease severity
- 945 *S. F. Hwang, H. U. Ahmed, Q. Zhou, S. E. Strelkov, B. D. Gossen, G. Peng and G. D. Turnbull*
Assessment of the impact of resistant and susceptible canola on *Plasmodiophora brassicae* inoculum potential
- 953 *K. P. Chong, M. Atong and S. Rossall*
The role of syringic acid in the interaction between oil palm and *Ganoderma boninense*, the causal agent of basal stem rot

Contents continued on inside back cover

Contents continued from outside back cover

- 964 M. M. Elsharkawy, M. Shimizu, H. Takahashi
and M. Hyakumachi
Induction of systemic resistance against *Cucumber
mosaic virus* by *Penicillium simplicissimum*
GP17-2 in *Arabidopsis* and tobacco
- 977 C. W. Tsai, M. P. Daugherty and R. P. P. Almeida
Seasonal dynamics and virus translocation of
Grapevine leafroll-associated virus 3 in
grapevine cultivars
- 986 M. Q. Wang, D. L. Xu, R. Li and G. H. Zhou
Genotype identification and genetic diversity of
Sugarcane yellow leaf virus in China
- 994 I. M. Fortes, E. Moriones and J. Navas-Castillo
Tomato chlorosis virus in pepper: prevalence in
commercial crops in southeastern Spain and
symptomatology under experimental
conditions
- 1002 C. Maleita, R. Curtis and I. Abrantes
Thermal requirements for the embryonic
development and life cycle of *Meloidogyne
hispanica*
