

# Table of Contents

## Editorial

- 575 The Impact of Chemical Pollution on Biodiversity and Ecosystem Services: the Need for an Improved Understanding  
*Thomas Backhaus, Jason Snape, and Jim Lazorchak*

## Letters to the Editor

- 577 Adaptation to Global Climate Change—A Bandage as the Guillotine Descends  
*Peter M Chapman*
- 578 Accelerating Progress at Contaminated Sediment Sites  
*John Toll*

## Brief Communication

- 580 Specific Environmental Release Categories—A Tool for Improving Chemical Safety Assessment in the EC—Report of a Multi-Stakeholder Workshop  
*Daniel Sättler, Frank Schnöder, Nannett Aust, Andreas Ahrens, Christian Bögi, Theo Traas, and Johannes Tolls*

## Special Series

- 586 Transitioning Sediment Quality Assessment into Regulations: Challenges and Solutions in Implementing California's Sediment Quality Objectives  
*Chris Beegan and Steven M Bay*
- 589 Framework for Interpreting Sediment Quality Triad Data  
*Steven M Bay and Stephen B Weisberg*
- 597 Comparison of National and Regional Sediment Quality Guidelines for Classifying Sediment Toxicity in California  
*Steven M Bay, Kerry J Ritter, Doris E Vidal-Dorsch, and L Jay Field*
- 610 Development and Evaluation of Sediment Quality Guidelines Based on Benthic Macrofauna Responses  
*Kerry J Ritter, Steven M Bay, Robert W Smith, Doris E Vidal-Dorsch, and L Jay Field*
- 625 Selection of Methods for Assessing Sediment Toxicity in California Bays and Estuaries  
*Darrin J Greenstein and Steven M Bay*
- 638 Habitat-Related Benthic Macrofaunal Assemblages of Bays and Estuaries of the Western United States  
*J Ananda Ranasinghe, Kathy I Welch, Peter N Slattery, David E Montagne, David D Huff, Henry Lee II, Jeffrey L Hyland, Bruce Thompson, Stephen B Weisberg, James M Oakden, Donald B Cadien, and Ronald G Velarde*
- 649 Effect of Sample Area and Sieve Size on Benthic Macrofaunal Community Condition Assessments in California Enclosed Bays and Estuaries  
*Kamille K Hammerstrom, J Ananda Ranasinghe, Stephen B Weisberg, John S Oliver, W Russell Fairey, Peter N Slattery, and James M Oakden*
- 659 Incorporating Contaminant Bioavailability into Sediment Quality Assessment Frameworks  
*Keith A Maruya, Peter F Landrum, Robert M Burgess, and James P Shine*

## Health & Ecological Risk Assessment

- 674 Assessing the Predictive Performance of Risk-Based Water Quality Criteria Using Decision Error Estimates from Receiver Operating Characteristics (ROC) Analysis  
*Douglas B McLaughlin*
- 685 Diagnosis of Potential Stressors Adversely Affecting Benthic Communities in New Bedford Harbor, MA (USA)  
*Kay T Ho, Marguerite C Pelletier, Daniel E Campbell, Robert M Burgess, Roxanne L Johnson, and Kenneth J Rocha*

(Continued)

# Table of Contents (Continued)

## Environmental Management

- 703 Good Modeling Practice Guidelines for Applying Multimedia Models in Chemical Assessments  
*Andreas M Buser, Matthew MacLeod, Martin Scheringer, Don Mackay, Mark Bonnell, Mark H Russell, Joseph V DePinto, and Konrad Hungerbühler*
- 709 A Dynamic Model Using Monitoring Data and Watershed Characteristics to Project Fish Tissue Mercury Concentrations in Stream Systems  
*Caroline Chan, John F Heinbokel, John A Myers, and Robert R Jacobs*
- 723 International Harmonization of Models for Selecting Less Toxic Chemical Alternatives: Effect of Regulatory Disparities in the United States and Europe  
*Carl W Lam, Muskilda P Aguirre, Karsten Schischke, Nils F Nissen, Oladele A Ogunseitan, and Julie M Schoenung*
- 731 Co-Occurrence of 1,4-Dioxane with Trichloroethylene in Chlorinated Solvent Groundwater Plumes at US Air Force Installations: Fact or Fiction  
*Richard H Anderson, Janet K Anderson, and Paul A Bower*

## Environmental Policy & Regulation

- 738 Simplification of Biotic Ligand Models of Cu, Ni, and Zn by 1-, 2-, and 3-Parameter Transfer Functions  
*Anja J Verschoor, Jos PM Vink, and Martina G Vijver*

## Life Cycle & Sustainability

- 749 Evaluating the Relevance of Seasonal Differentiation of Human Health Intake Fractions in Life Cycle Assessment  
*Rima Manneh, Manuele Margni, and Louise Deschênes*

## Departments

- 760 Learned Discourses: Timely Scientific Opinions  
768 Book Reviews

## Erratum

- 773 A Framework for Interpreting Sediment Quality Triad Data  
*Steven M Bay and Stephen B Weisberg*
