

Regular Papers

Comparison of <i>in vitro</i> and <i>in vivo</i> fertilizing potential of bovine semen frozen in egg yolk or new lecithin based extenders A.M. Crespilho, M.F. Sá Filho, J.A. Dell'Aqua Jr., M. Nichi, G.A. Monteiro, B.R. Avanzi, A. Martins and F.O. Papa	1
Effect of average daily gain on body size, metabolism, and milk production of Italian Holstein heifers raised on two different planes of nutrition and calving at two different ages F. Abeni, L. Calamari, L. Stefanini and G. Pirlo	7
Effect of dietary bacterial lysine by-product meal supplementation on growth performance and excretion of purine base derivatives in growing-finishing pigs Y. Zhao, B. Yu, X. Mao, J. He, Z. Huang, Q. Mao and D. Chen	18
Heritabilities of agonistic behavioural traits in pigs and their relationships within and between different age groups A. Stukenborg, I. Traulsen, E. Stamer, B. Puppe, U. Presuhn and J. Krieter	25
The effect of space allowance for finishing pigs on productivity and pen hygiene T. Jensen, C. Kold Nielsen, J. Vinther and R.B. D'Eath	33
Dose-dependent response of intramuscular fat accumulation in <i>longissimus dorsi</i> muscle of finishing pigs to dietary lysine levels M. Katsumata, T. Kyoya, A. Ishida, M. Ohtsuka and K. Nakashima	41
Effects of corn DDGS in combination with compound enzymes on growth performance, carcass fat quality, and plasma and tissue redox homeostasis of growing-finishing pigs G. Li, X. Wang, M. Lin, Z. Lu and W. Yao	46
Relationship between conformation traits and longevity in Polish Holstein Friesian cattle M. Morek-Kopeć and A. Zarnecki	53
Voluntary selection of starter feed ingredients offered separately to nursing calves C. Montoro and A. Bach	62
Synchronized lying in cattle in relation to time of day S. Stoye, M.A. Porter and M. Stamp Dawkins	70
Effects of wheat processing and dietary fat sources on performance, ruminal and blood parameters, and steak fatty acids profile of Holstein steers K. Erjaei, A. Zali, M. Ganjkanloo, M. Dehghan-Banadaky, V. Tufarelli and V. Laudadio	74
<i>DGAT1</i> -exon8 polymorphism in Anatolian buffalo F. Özdil and F. İlhan	83
Behaviour response to two-step weaning is diminished in beef calves previously submitted to temporary weaning with nose flaps M.J. Hötzel, G. Quintans and R. Ungerfeld	88
Tissues expression analysis, novel SNPs of the bovine <i>Angptl4</i> gene and its effects on bovine bioeconomic traits Y. Ma, N. Chen, R. Li, T. Yang, Y. Xu, F. Li, H. Gao, X. Zheng, S. Li, H. Zhang, Y. Huang, F. Bai, J. Wang, Y. Li, X. Wang and J. Li	96
Effects of xylanase supplementation on ruminal digestibility in fistulated non-lactating dairy cows fed rice straw N. Phakachoed, P. Lounglawan and W. Suksombat	104

Growth performance and nutrient utilisation in crossbred calves experimentally infected with <i>F. gigantica</i> and/or supplemented with deoiled mahua (<i>Bassia latifolia</i>) seed cake A.B. Jacob, P. Singh and A.K. Verma	109
Welfare of entire males and females in organic pig production when reared in single-sex groups R. Thomsen, M. Bonde, A.G. Kongsted and T. Rousing	118
Chain length of inulin affects its degradation and the microbiota in the gastrointestinal tract of weaned piglets after a short-term dietary application N. Paßlack, M. Al-samman, W. Vahjen, K. Männer and J. Zentek	128
Stable isotopes for determining carbon turnover in sheep feces and blood M.B. Martins, C. Ducatti, C.L. Martins, J.C. Denadai, A.S. Natel, C.R. Souza-Kruliski and M.M.P. Sartori	137
Exploring variation in economic, environmental and societal performance among Dutch fattening pig farms M.A. Dolman, H.C.J. Vrolijk and I.J.M. de Boer	143
Effects of dietary corn dried distillers grains with solubles and vitamin E on growth performance, meat quality, fatty acid profiles, and pork shelf life of finishing pigs H. Wang, L.-S. Wang, B.-M. Shi and A.-S. Shan	155
Effect of divergent selection for the computer tomography measured thigh muscle volume on productive and carcass traits of growing rabbits Zs. Szendrő, Sz. Metzger, I. Nagy, A. Szabó, Zs. Petrás, T. Donkó and P. Horn	167
Short Communications	
Longitudinal threshold model analysis of clinical mastitis using linear splines E. Negussie, I. Strandén, S. Tsuruta and E.A. Mäntysaari	173
The effects of genotype and dietary lysine concentration on the production of weaner pigs A.E. Taylor, P. Toplis, I.J. Wellock and H.M. Miller	180
Preference, consumption and weight gain of sheep supplemented with multinutritional blocks made with fodder tree leaves R. Martínez-Martínez, S. López-Ortiz, Ma.E. Ortega-Cerrilla, R. Soriano-Robles, J.G. Herrera-Haro, J. López-Collado and E. Ortega-Jiménez	185
Effects of hormone or mineral-vitamin enriched colostrum on performance and weaning age of Holstein calves M. Sanei, M. Khorvash, H.R. Rahmani and H. Sadri	190
Daily rhythms of acute phase proteins in cattle under different natural environmental conditions C. Giannetto, S. Casella, E. Giudice, S. Marafioti, F. Fazio and G. Piccione	195
Effect of gamma irradiation and autoclaving on sterilization and amino acids digestibility of diets for specific pathogen free mini-pigs containing either soybean meal or whey protein J.Y. Lee, S.B. Cho, Y.Y. Kim and S.J. Ohh	201
