

# Benefit Risk Analysis for Foods (BRAFO): Qualitative and Quantitative Comparison of Human Health Risks and Benefits of Foods and Food Components

## CONTENTS

<i>S. Vidry and L. Contor</i>	S683–S683	Foreword
<i>J. Hoekstra, A. Hart, A. Boobis, E. Claupein, A. Cockburn, A. Hunt, I. Knudsen, D. Richardson, B. Schilter, K. Schütte, P. R. Torgerson, H. Verhagen, B. Watzl and A. Chiodini</i>	S684–S698	BRAFO tiered approach for benefit–risk assessment of foods
<i>B. Watzl, E. Gelencsér, J. Hoekstra, S. Kulling, E. Lydeking-Olsen, I. Rowland, B. Schilter, J. van Klaveren and A. Chiodini</i>	S699–S709	Application of the BRAFO-tiered approach for benefit-risk assessment to case studies on natural foods
<i>H. Verhagen, R. Andersen, J.-M. Antoine, P. Finglas, J. Hoekstra, A. Kardinaal, H. Nordmann, G. Pekcan, K. Pentieva, T. A. Sanders, H. van den Berg, H. van Kranen and A. Chiodini</i>	S710–S723	Application of the BRAFO tiered approach for benefit–risk assessment to case studies on dietary interventions
<i>K. Schütte, H. Boeing, A. Hart, W. Heeschen, E. H. Reimerdes, D. Santare, K. Skog and A. Chiodini</i>	S724–S735	Application of the BRAFO tiered approach for benefit–risk assessment to case studies on heat processing contaminants
