

CONTENTS

Editorial Commentary

- 611 **Large-scale bioenergy from additional harvest of forest biomass is neither sustainable nor greenhouse gas neutral**
Ernst-Detlef Schulze, Christian Körner, Beverly E. Law, Helmut Haberl and Sebastiaan Luysaert

Letter

- 617 **A comment to "Large-scale bioenergy from additional harvest of forest biomass is neither sustainable nor greenhouse gas neutral": Important insights beyond greenhouse gas accounting**
Ryan M. Bright, Francesco Cherubini, Rasmus Astrup, Neil Bird, Annette L. Cowie, Mark J. Ducey, Gregg Marland, Kim Pingoud, Ilkka Savolainen and Anders H. Strømman

Review

- 620 **Bioenergy crop models: descriptions, data requirements, and future challenges**
Sujithkumar Surendran Nair, Shujiang Kang, Xuesong Zhang, Fernando E. Miguez, R. Cesar Izaurralde, Wilfred M. Post, Michael C. Dietze, Lee R. Lynd and Stan D. Wullschlegler

Original Articles

- 634 **Assessing the potential of wildfires as a sustainable bioenergy opportunity**
Santiago R. Verón, Esteban G. Jobbágy, Carlos M. Di Bella, José M. Paruelo and Robert B. Jackson
- 642 **Biomass production potential from *Populus* short rotation systems in Romania**
Christian Werner, Edwin Haas, Rüdiger Grote, Martin Gauder, Simone Graeff-Höninger, Wilhelm Claupein and Klaus Butterbach-Bahl
- 654 **Second harvest—Is there sufficient stubble for biofuel production in Australia?**
Alexander Herr, Deborah O'Connell, Michael Dunlop, Murray Unkovich, Perry Poulton and Michael Poole
- 661 **Establishment of reed canary grass with perennial legumes or barley and different fertilization treatments: effects on yield, botanical composition and nitrogen fixation**
Eva Lindvall, Anne-Maj Gustavsson and Cecilia Palmborg
- 671 **Functional group and fertilization affect the composition and bioenergy yields of prairie plants**
Meghann E. Jarchow, Matt Liebman, Vertika Rawat and Robert P. Anex
- 680 **Effects of temperature, illumination and node position on stem propagation of *Miscanthus x giganteus***
Nicholas N. Boersma and Emily A. Heaton
- 688 **Impact of nitrogen allocation on growth and photosynthesis of *Miscanthus (Miscanthus x giganteus)***
Dan Wang, Mathew W. Maughan, Jindong Sun, Xiaohui Feng, Fernando Miguez, Dokyoung Lee and Michael C. Dietze
- 698 ***Miscanthus x giganteus* leaf senescence, decomposition and C and N inputs to soil**
Norbert Amougou, Isabelle Bertrand, Stéphane Cadoux and Sylvie Recous
- 708 **Non-edible oil seed producing *Calophyllum inophyllum* ideal for India's future biofuel development**
Govindasamy Agoramoorthy, Jayant Sarnaik, Rahul Mungikar, Sameer Punde and Minna J. Hsu
- 713 **Bioenergy production and Skylark (*Alauda arvensis*) population abundance – a modelling approach for the analysis of land-use change impacts and conservation options**
Jan Engel, Andreas Huth and Karin Frank
- 728 **High value of short rotation coppice plantations for phyto diversity in rural landscapes**
Sarah Baum, Andreas Bolte and Martin Weih
- 739 **Modeling biogeochemical impacts of bioenergy buffers with perennial grasses for a row-crop field in Illinois**
Gayathri Gopalakrishnan, Maria Cristina Negri and William Salas
- 751 **'Bioenergy from cattle manure? Implications of anaerobic digestion and subsequent pyrolysis for carbon and nitrogen dynamics in soil'**
Socrates Schouten, Jan W. van Groenigen, Oene Oenema and Maria L. Cayuela
- 761 **Is woody bioenergy carbon neutral? A comparative assessment of emissions from consumption of woody bioenergy and fossil fuel**
Giuliana Zanchi, Naomi Pena and Neil Bird
- 773 **Projection of the future EU forest CO₂ sink as affected by recent bioenergy policies using two advanced forest management models**
Hannes Böttcher, Pieter Johannes Verkerk, Mykola Gusti, Petr Havlik and Giacomo Grassi
- 784 **Application of probability distributions to the modeling of biogenic CO₂ fluxes in life cycle assessment**
Francesco Cherubini, Geoffrey Guest and Anders H. Strømman
- 799 **Greenhouse gas emissions and abatement costs of biofuel production in South Africa**
Jan Tomaschek, Enver Doruk Özdemir, Ulrich Fahl and Ludger Eltrop
- 811 **Net atmospheric impacts of forest bioenergy production and utilization in Finnish boreal conditions**
Antti Kilpeläinen, Seppo Kellomäki and Harri Strandman
- 818 **Carbon debt and carbon sequestration parity in forest bioenergy production**
Stephen R. Mitchell, Mark E. Harmon and Kari E. B. O'Connell
- 828 **The economic performance of *Jatropha*, cassava and Eucalyptus production systems for energy in an East African smallholder setting**
Janske van Eijck, Edward Smeets and André Faaij
- 846 **Greenhouse gas balance due to the conversion of sugarcane areas from burned to green harvest, considering other conservationist management practices**
Ricardo de Oliveira Bordonal, Eduardo Barretto de Figueiredo and Newton La Scala Jr
- 859 **Spatiotemporal land use modelling to assess land availability for energy crops – illustrated for Mozambique**
Floor van der Hilst, Judith A. Verstegen, Derek Karssenbergh and André P. C. Faaij
- 875 **Identifying potential areas for biofuel production and evaluating the environmental effects: a case study of the James River Basin in the Midwestern United States**
Yiping Wu, Shuguang Liu and Zhengpeng Li
- 889 **Modelling the carbon and nitrogen balances of direct land use changes from energy crops in Denmark: a consequential life cycle inventory**
Lorie Hamelin, Uffe Jørgensen, Bjørn M. Petersen, Jørgen E. Olesen and Henrik Wenzel
- 908 **Extent of industrial plantations on Southeast Asian peatlands in 2010 with analysis of historical expansion and future projections**
Jukka Miettinen, Alijsa Hooijer, Chenghua Shi, Daniel Tollenaar, Ronald Vernimmen, Soo Chin Liew, Chris Malins and Susan E. Page
- 919 **Total lipid and fatty acid composition of seaweeds for the selection of species for oil-based biofuel and bioproducts**
Björn J. Gosch, Marie Magnusson, Nicholas A. Paul and Rocky de Nys
