Articles

- In vitro* and *in vivo* degradation of *myo*-inositol hexakisphosphate by a phytase from *Citrobacter braakii*
Katrine Pontoppidan, Vibe Glitsoe, Patrick Guggenbuhl, Arturo Piñón Quintana, Carlos Simões Nunes, Dan Pettersson and Ann-Sofie Sandberg 431
- Digestibility of fibre sources and molecular weight distribution of fibre fractions in ileal digesta of growing pigs
Emma Ivarsson, Roger Andersson and Jan Erik Lindberg 445
- Variations in chemical composition and *in vitro* and *in situ* ruminal degradation characteristics of dried distillers' grains with solubles from European ethanol plants
Edwin Westreicher-Kristen, Herbert Steingass and Markus Rodehutschord 458
- Elevated CO₂ and drought stress effects on the chemical composition of maize plants, their ruminal fermentation and microbial diversity *in vitro*
Birgit Meibaum, Susanne Riede, Bernd Schröder, Remy Manderscheid, Hans-Joachim Weigel and Gerhard Breves 473
- Equine pre-caecal and total tract digestibility of individual carbohydrate fractions and their effect on caecal pH response
Christine Brøkner, Dag Austbø, Jon Anders Næsset, Knud Erik Bach Knudsen and Anne-Helene Tauson 490
- ## Research Note
- Sulphur levels in saliva as an estimation of sulphur status in cattle: a validation study
Veronique Dermauw, Eric Froidmont, Jan Dijkstra, Johan De Boever, Wim Vyverman, Ann-Eline Debeer and Geert P.J. Janssens 507
