## REVIEW

- Page 467 Production of conjugated linoleic acid by food-grade bacteria: A review  
*J C Andrade, K Ascenção, P Gullón, S M S Henriques, J M S Pinto, T A P Rocha-Santos, A C Freitas and A M Gomes*

## ORIGINAL RESEARCH

- Page 482 A comparison of micellar casein and  $\beta$ -casein as sources of basic peptides through tryptic hydrolysis and their enrichment using two-stage ultrafiltration  
*A E Post, H Sampels, A Holder and J Hinrichs*
- Page 490 Naturally occurring variations in milk pH and ionic calcium and their effects on some properties and processing characteristics of milk  
*Y Nian, B Y Chen, P Aikman, A Grandison and M Lewis*
- Page 498 Evaluation of trichloromethane formation from chlorine-based cleaning and disinfection agents in cow's milk  
*R Siobhan, G David, J Kieran, F Ambrose and O' B Bernadette*
- Page 503 Partitioning of nitroxylin, oxytoclozanide and levamisole residues from milk to cream, skim milk and skim milk powder  
*C Power, R Sayers, B O'Brien, Y Bloemhoff, M Danaher, A Furey and K Jordan*
- Page 507 The concentrations of some hormones and growth factors in bovine and human colostrums: Short communication  
*Z Ai, Z Yumei, Y Titi, S Qinghai, K Xiaohong and W Peiyu*
- Page 511 Naturally occurring  $^{137}\text{Cs}$ ,  $^{90}\text{Sr}$  and  $^{226}\text{Ra}$  radionuclides in raw milk in the Sibiu province of Romania  
*T Mihaela, K Otto and T Ovidiu*
- Page 516 Heavy metal concentrations in raw milk collected from different regions of Samsun, Turkey  
*H Temiz and A Soylu*
- Page 523 Effect of a bacteriocin-producing strain of *Lactobacillus paracasei* on the nonstarter microflora of Cheddar cheese  
*D Ristagno, J A Hannon, T P Beresford and P L H McSweeney*
- Page 531 Microbial diversity and dynamics of Pecorino di Filiano PDO, a traditional cheese of Basilicata region (Southern Italy)  
*M G Bonomo and G Salzano*
- Page 542 Influence of an autochthonous starter culture and a commercial starter on the characteristics of Tenerife pasteurised goats' milk cheese  
*L González and V Zárate*
- Page 548 Extending the shelf life of fresh ewe's cheese by modified atmosphere packaging  
*A Del Caro, A M Sanguinetti, C Fadda, G Murittu, A Santoru and A Piga*
- Page 555 Physicochemical differences between Croatian cheese matured in a lamb skin sack (Sir iz misine) and cheese matured in a rind throughout ripening  
*M T Kalit, S Kalit, N Kelava and J Havranek*
- Page 561 The influence of probiotic bacteria on the properties of Iranian white cheese  
*M Mahmoudi, A Khosrowshahi Asl and S Zomorodi*
- Page 568 Characterisation of a cell-free supernatant obtained from cultures of *Enterococcus faecalis* DBFIQ E24 with antagonistic activity against bacteria, yeasts and moulds  
*M de L M Cardoso, R M Manzo, G G Tonarelli and A C Simonetta*
- Page 578 Comparison of free amino acids and volatile components in three fermented milks  
*A Irigoyen, M Ortigosa, S García, F C Ibáñez and P Torre*
- Page 585 The effects of using a starter culture, lipase, and protease enzymes on ripening of Mihalic cheese  
*T Ozcan and E Kurdal*
- Page 594 Influence of manufacturing conditions and discrimination of Northern Spanish cheeses using multi-element analysis  
*R Moreno-Rojas, F Cámara-Martos, P J Sánchez-Segarra and M Á Amaro-López*
- Page 603 Production of conjugated linoleic acid by lactic acid bacteria in milk without any additional substrate  
*A Pandit, S Anand, K Kalscheur and A Hassan*
- Page 609 Performance and biomass kinetics of activated sludge system treating dairy wastewater  
*F M E Emerald, D S A Prasad, M R Ravindra and H A Pushpadass*
