

Plant Pathology

Volume 61, Number 1, February 2012

Contents

Review

- 1 T. F. Döring, M. Pautasso, M. R. Finckh and M. S. Wolfe
Concepts of plant health – reviewing and challenging the foundations of plant protection

Original Articles

- 16 A.-C. Wallenhammar, C. Almquist, M. Söderström and A. Jonsson
In-field distribution of *Plasmodiophora brassicae* measured using quantitative real-time PCR
- 29 U. Merz, A. K. Lees, L. Sullivan, R. Schwärzel, T. Hebeisen, H. G. Kirk, K. Bouček-Mechiche and H. R. Hofferbert
Powdery scab resistance in *Solanum tuberosum*: an assessment of cultivar × environment effect
- 37 D. H. Gent, J. L. Farnsworth and D. A. Johnson
Spatial analysis and incidence–density relationships for downy mildew on hop
- 48 H. T. H. Truong, K. T. Kim, D. W. Kim, S. Kim, Y. Chae, J. H. Park, D. G. Oh and M. C. Cho
Identification of isolate-specific resistance QTLs to phytophthora root rot using an intraspecific recombinant inbred line population of pepper (*Capsicum annuum*)
- 57 P. Krokene, E. Lahr, L. S. Dalen, T. Skrøppa and H. Solheim
Effect of phenology on susceptibility of Norway spruce (*Picea abies*) to fungal pathogens
- 63 C. Boedo, S. Benichou, R. Berruyer, S. Bersihand, A. Dongo, P. Simoneau, M. Lecomte, M. Briard, V. Le Clerc and P. Poupard
Evaluating aggressiveness and host range of *Alternaria dauci* in a controlled environment
- 76 B. M. A. De Coninck, O. Amand, S. L. Delauré, S. Lucas, N. Hias, G. Weyens, J. Mathys, E. De Bruyne and B. P. A. Cammue
The use of digital image analysis and real-time PCR fine-tunes bioassays for quantification of *Cercospora* leaf spot disease in sugar beet breeding
- 85 R. Travadon, K. Baumgartner, P. E. Rolshausen, W. D. Gubler, M. R. Sosnowski, P. Lecomte, F. Halleen and J.-P. Péros
Genetic structure of the fungal grapevine pathogen *Eutypa lata* from four continents
- 96 S. E. Legler, T. Caffi and V. Rossi
A nonlinear model for temperature-dependent development of *Erysiphe necator* chasmothecia on grapevine leaves
- 106 O. Frenkel, I. Portillo, M. T. Brewer, J. P. Péros, L. Cadle-Davidson and M. G. Milgroom
Development of microsatellite markers from the transcriptome of *Erysiphe necator* for analysing population structure in North America and Europe
- 120 R. Shetty, B. Jensen, N. P. Shetty, M. Hansen, C. W. Hansen, K. R. Starkey and H. J. L. Jørgensen
Silicon induced resistance against powdery mildew of roses caused by *Podosphaera pannosa*
- 132 C. Borrero, M. I. Trillas, A. Delgado and M. Avilés
Effect of ammonium/nitrate ratio in nutrient solution on control of *Fusarium* wilt of tomato by *Trichoderma asperellum* T34

Contents continued on inside back cover

Contents continued from outside back cover

- 140 A. Picot, D. Hourcade-Marcolla, C. Barreau, L. Pinson-Gadais, D. Caron, F. Richard-Forget and C. Lannou
Interactions between *Fusarium verticillioides* and *Fusarium graminearum* in maize ears and consequences for fungal development and mycotoxin accumulation
- 152 K. Myung, N. C. Zitomer, M. Duvall, A. E. Glenn, R. T. Riley and A. M. Calvo
The conserved global regulator VeA is necessary for symptom production and mycotoxin synthesis in maize seedlings by *Fusarium verticillioides*
- 161 L. Tsrer (Labkim), O. Erlich, M. Hazanovsky, B. Ben Daniel, U. Zig and S. Lebiush
Detection of *Dickeya* spp. latent infection in potato seed tubers using PCR or ELISA and correlation with disease incidence in commercial field crops under hot-climate conditions
- 169 R. Czajkowski, W. J. de Boer, J. A. van Veen and J. M. van der Wolf
Characterization of bacterial isolates from rotting potato tuber tissue showing antagonism to *Dickeya* sp. biovar 3 *in vitro* and *in planta*
- 183 T.-C. Chen, J.-T. Li, Y.-P. Lin, Y.-C. Yeh, Y.-C. Kang, L.-H. Huang and S.-D. Yeh
Genomic characterization of Calla lily chlorotic spot virus and design of broad-spectrum primers for detection of tospoviruses
- 195 A. Marais, L. Svanella-Dumas, M. Barone, P. Gentit, C. Faure, G. Charlot, A. Ragozzino and T. Candresse
Development of a polyvalent RT-PCR detection assay covering the genetic diversity of *Cherry capillovirus A*
- 205 D. E. Goszczyński and N. Habili
Grapevine virus A variants of group II associated with Shiraz disease in South Africa are present in plants affected by Australian Shiraz disease, and have also been detected in the USA
