

REVIEW

- 841 **Perspectives on the history of research on starch Part III: On the era of confusion due to terminology** K. Seetharaman and E. Bertoft

RESEARCH ARTICLE

- 846 **Study on gelatinization property and edible quality mechanism of rice** T. Huang, B. Zhu, X. Du, B. Li, X. Wu and S. Wang
- 855 **Physicochemical, crystallinity, pasting and thermal properties of heat-moisture-treated pinhão starch** V. Z. Pinto, N. L. Vanier, B. Klein, E. da Rosa Zavareze, M. C. Elias, L. C. Gutkoski, E. Helbig and A. R. G. Dias
- 864 **Physicochemical, crystalline, and thermal properties of native and enzyme hydrolyzed *Pueraria lobata* (Willd.) Ohwi and *Pueraria thomsonii* Benth. starches** Y. Xia, W. Gao, Q. Jiang, X. Li, L. Huang and P. Xiao
- 874 **Effects of protein removal on the physicochemical properties of waxy maize flours** D. Lu and W. Lu
- 882 **Oxidized banana starch-polyvinyl alcohol film: Partial characterization** H. M. Palma-Rodríguez, G. Aguirre-Álvarez, N. Chavarría-Hernández, A. I. Rodríguez-Hernández, L. A. Bello-Pérez and A. Vargas-Torres
- 890 **The effect of long-term alkali treatment on the molecular characteristics of native and extruded starches at 35°C** W. Praznik, K. Buksa, R. Ziobro, H. Gambuś and A. Nowotna
- 898 **Formation of oil-in-water (O/W) pickering emulsions via complexation between  $\beta$ -cyclodextrin and selected organic solvents** L. Davarpanah and F. Vahabzadeh

SHORT COMMUNICATION

- 914 **Characterization of an acidophilic and thermostable  $\alpha$ -amylase from *Alicyclobacillus sendaiensis* NUST** D. Li, J. Sheng, J. Yang, C. Yang, Z. Zeng and L. Sheng

RESEARCH ARTICLE

- 921 **The inhibition effects of reactive oxygen species by Maillard reaction products in Caco-2 cells** S. Y. Chung, Y. K. Lee, S. H. Han, S. W. Lee and C. Rhee

REVIEW

- 929 **Perspectives on the history of research on starch Part IV: On the visualization of granule architecture** K. Seetharaman and E. Bertoft

RESEARCH ARTICLE

- 935 **Application of response surface methodology (RSM) for optimization of cassava starch grafted polyDADMAC synthesis for cationic properties** M. A. A. Razali, N. Sanusi, H. Ismail, N. Othman and A. Ariffin
- 944 **Influence of di-functional versus multi-functional chain extenders on the foamability of a potato starch-based biopolymer** H. Oza, M. R. Thompson, A. N. Hrymak and Q. Liu
- 955 **A statistical approach to the optimization of cold-adapted amylase production by *Exiguobacterium* sp. SH3** R. Heydari, H. S. Zahiri, K. A. Noghabi, V. V. Rad and G. B. Khaniki
- 964 **Effect of debranching and storage condition on crystallinity and functional properties of cassava and potato starches** P. V. Hung, N. T. L. Phi and T. T. V. Vy
- 972 **Interaction of cationic starch derivatives and cellulose fibres in the wet end and its correlation to paper strength with a statistical evaluation** M. Ulbrich, S. Radosta, B. Kießler and W. Vorwerg
- 984 **A facile approach for controlled synthesis of hydrophilic starch-based nanoparticles from native sago starch** S. H. Tay, S. C. Pang and S. F. Chin
- 991 **Studies of IAA and IBA as fungal  $\alpha$ -amylase inhibitors using enzyme kinetics, molecular modeling and thermodynamics** K. V. Dileep, I. Tintu, C. Remya, M. Haridas and C. Sadasivan
- 996 **Rheological, thermal properties, and gelatinization kinetics of tapioca starch–trehalose blends studied by non-isothermal DSC technology** X. Zhang, W. Zhu, Q. Tong and F. Ren
- 1003 **Characterization of glucoamylase immobilized on magnetic nanoparticles** A. Panek, O. Pietrow and J. Synowiecki
