78	<b>The effect of chemically-modified resistant starch, RS type-4, on body weight and blood lipid profiles of high fat diet-induced obese mice</b>	K. Y. Lee, S.-H. Yoo and H. G. Lee

## RESEARCH ARTICLE

- 87 **Determination of molar mass distribution of tapioca starch using asymmetrical flow field flow fractionation** S. Juna and A. Huber
- 97 **A starch/milled-montmorillonite nanocomposite for warp sizing** M. Gao and P.-x. Zhu
- 105 **Physicochemical properties of starches obtained from Polish potato cultivars** K. Pycia, L. Juszczak, D. Gałkowska and M. Witczak
- 115 **Effect of acid treatment on the physicochemical and structural characteristics of starches from different botanical sources** H. M. Palma-Rodriguez, E. Agama-Acevedo, G. Mendez-Montealvo, R. A. Gonzalez-Soto, E. J. Vernon-Carter and L. A. Bello-Pérez
- 126 **Influence of enzyme active and inactive soy flours on cassava and corn starch properties** L. S. Sciarini, P. D. Ribotta, A. E. León and G. T. Pérez
- 136 **Novel extracellular hyper acidophil and thermostable  $\alpha$ -amylase from *Micrococcus* sp.NS 211** N. Samie, P. R. M. Reddy and M. Ashouri
- 145 **Succinylated *Dioscorea cayenensis* starch: Effect of reaction parameters and characterisation** O. S. Lawal
- 157 **Effects of high hydrostatic pressure on the RS content of amaranth, quinoa and wheat starch** G. Linsberger-Martin, B. Lukasch and E. Berghofer

## SHORT COMMUNICATION

- 166 **Morphological changes of starch granules during grain filling and seed germination in wheat** C. Y. Li, C. Li, Z. X. Lu, W. H. Li and L. P. Cao
