

# JOURNAL OF APPLIED POULTRY RESEARCH

March 2012

Volume 21, Number 1

## CONTENTS

### Research Reports

- A comparison of digestible amino acid databases: Relationship between amino acid concentration and digestibility**  
M. Tahir and G. M. Pesti 1
- Deactivation of T-2 toxin in broiler ducks by the feed additive Detoxa Plus**  
J. Kutasi, Z. Papp, L. Jakab, E. Brydl, and P. Rafai 13
- Protein requirements for growth, feed efficiency, and meat production in growing mule ducks**  
E. Baéza, M. D. Bernadet, and M. Lessire 21
- Detection of infectious laryngotracheitis virus from darkling beetles and their immature stage (lesser mealworms) by quantitative polymerase chain reaction and virus isolation**  
S.-C. Ou, J. J. Giambrone, and K. S. Macklin 33
- Justifying phylogenetic feed additive matrix values in conjunction with exogenous feed enzymes**  
L. K. Shires, K. G. S. Lilly, S. A. Loop, C. K. Gehring, P. J. Turk, and J. S. Moritz 39
- Effects of feeding distillers dried grains with solubles to broilers from 0 to 42 days posthatch on broiler performance, carcass characteristics, and selected intestinal characteristics**  
R. E. Loar II, J. R. Donaldson, and A. Corzo 48
- The influence of double interspiking on production and behavior in broiler breeder flocks in elevated temperature conditions**  
K. M. Chung, M. O. Smith, and H. G. Kattesh 63
- Interactive effects of feed form and dietary lysine on growth responses of commercial broiler chicks**  
A. Corzo, L. Mejia, C. D. McDaniel, and J. S. Moritz 70
- Determination of the arginine, tryptophan, and glycine ideal-protein ratios in high-yield broiler chicks**  
A. Corzo 79
- Sperm production and testicular development of broiler breeder males reared on shortened growth cycles**  
J. R. Moyle, D. E. Yoho, S. M. Whipple, A. M. Donoghue, and R. K. Bramwell 88

<b>A comparative examination of rearing parameters and layer production performance for brown egg-type pullets grown for either free-range or cage production</b>	
J. B. Golden, D. V. Arbona, and K. E. Anderson	95
<b>Brown rice as a potential feedstuff for poultry</b>	
M. N. Asyifah, S. Abd-Aziz, L. Y. Phang, and M. N. Azlian	103
<b>Northern fowl mite (<i>Ornithonyssus sylviarum</i>) control evaluations using liquid formulations of diatomaceous earth, kaolin, sulfur, azadirachtin, and <i>Beauveria bassiana</i> on caged laying hens</b>	
B. A. Mullens, D. Soto, C. D. Martin, B. L. Callahan, and A. C. Gerry	111
<b>Influence of dietary enzyme supplementation of barley-based diets on growth performance and footpad dermatitis in broiler chickens exposed to early high-moisture litter</b>	
Ö. Cengiz, B. H. Köksal, A. G. Önel, O. Tatlı, Ö. Sevim, H. Avcı, and S. F. Bilgili	117
<b>Relative bioavailability in chicks of manganese from manganese propionate</b>	
M. A. Brooks, J. L. Grimes, K. E. Lloyd, F. Valdez, and J. W. Spears	126
<b>Field Report</b>	
<b>A mobile modified-atmosphere killing system for small-flock depopulation</b>	
A. B. Webster and S. R. Collett	131
<b>Informal Nutrition Symposium</b>	
<b>Biological limits to productivity</b>	
S. Leeson	145
<b>Optimizing broiler performance using different amino acid density diets: What are the limits?</b>	
S. L. Vieira and C. R. Angel	149
<b>Poultry response to high levels of dietary fiber sources varying in physical and chemical characteristics</b>	
G. G. Mateos, E. Jiménez-Moreno, M. P. Serrano, and R. P. Lázaro	156
<b>Nutritional limitations during poultry embryonic development</b>	
Z. Uni, L. Yadgary, and R. Yair	175
<b>Maximum immunity effectors: Mechanisms and animal performance limitations</b>	
R. K. Selvaraj	185
<b>National Extension Workshop</b>	
<b>Washington update</b>	
R. Reynnells	193
