Volume 64, No. 3, March 2012

RESEARCH ARTICLE

- 171 **Molecular characteristics of native sago starch and isolated fractions determined using asymmetrical flow field-flow fractionation** S. Juna and A. Huber
- 181 **Isolation, composition, morphological and pasting properties of starches from rice cultivars grown in Nigeria** A. O. Ashogbon and T. E. Akintayo
- 188 **Low power microwave-assisted enzymatic esterification of starch** M. Lukasiewicz and S. Kowalski
- 198 **Effects of three reducing agents on pasting properties of stored rice** Y. Guo, K. Tu, L. Pan, W. Zhang and Y. Zhang
- 207 **Synthesis, characterization and swelling behaviour of superabsorbent polymers from cassava starch-graft-poly(acrylamide)** P. C. Parvathy and A. N. Jyothi
- 219 **Starch-lipid composites containing cinnamaldehyde** C. Bilbao-Sáinz, B.-S. Chiou, A. de Campos, W.-X. Du, D. F. Wood, A. P. Klamczynski, G. M. Glenn and W. J. Orts
- 229 **Effects of annual fluctuation of environmental factors on starch properties in potato tuber development** T. Noda, S. Tsuda, M. Mori, T. Suzuki, S. Takigawa, C. Matsuura-Endo, H. Yamauchi and M. Z. I. Sarker
- 237 **Starch/zirconium phosphate composite films: Hydration, thermal stability, and mechanical properties** M. Pica, A. Donnadio and M. Casciola
- 246 **Physicochemical properties of starch isolated from *Antiaris africana* seeds in comparison with maize starch** L. M. Nwokocha, K. E. Nwokocha and P. A. Williams

Contents

Volume 64, No. 4, April 2012

RESEARCH ARTICLE

- 255 **Thermoplastic starch modified with polyurethane microparticles: Effects of hydrophilicity of polyurethane prepolymer** X. Chen, Y. Zhang, P. Zhang, B. Fan and Q. Wu
- 263 **Preparation of water-soluble starch oligomers from variable starch species in 1-allyl-3-methylimidazolium chloride** K. Lappalainen, J. Kärkkäinen, J. Panula-Perälä and M. Lajunen
- 272 **The influence of Cu(II) ions on physicochemical properties of potato starch oxidised by hydrogen peroxide** S. Pietrzyk, L. Juszcak, T. Fortuna, M. Łabanowska, E. Bidzińska and K. Błoniarczyk
- 281 **Cyclodextrin and methacrylic acid octyl phenols poly(ethylene oxide) ester-induced synergistic effect in a novel poly(AM-co-A-β-CD-co-AE) polymer** C. Zou, Q. Tang, N. Tan, P. Xiao and X. Hu
- 290 **Physicochemical properties of new starches isolated from *Dioscorea opposita* Thunb. bulbils** H. Zhou, J. Wang, X. Fang, Y. Sun and X. Dou
- 297 **Gelatinisation properties of native and annealed potato starches** K. Alvani, X. Qi and R. F. Tester
- 304 **Physicochemical, structural, and digestibility properties of enzymatic modified plantain and mango starches** M. G. Casarrubias-Castillo, B. R. Hamaker, S. L. Rodriguez-Ambroz and L. A. Bello-Pérez
- 313 **Structural modification of waxy, regular, and high-amylose maize and hulless barley starches on partial acid hydrolysis and their impact on physicochemical properties and chemical modification** J. Gao, T. Vasanthan, R. Hoover and J. Li
-
- 326 **Functional and tableting properties of acetylated and oxidised finger millet (*Eleusine coracana*) starch** T. A. Afolabi, B. I. Olu-Owolabi, K. O. Adebawale, O. S. Lawal and C. O. Akintayo
