Park J-J, Shin K-I, Lee J-H, Lee SE, Lee W-K, Cho K  
Detecting and cleaning outliers for robust estimation of variogram models in insect count data 1

Xue L, Hagihara A  
Self-thinning lines of organs and aboveground parts based on allometric relationships in overcrowded *Pinus densiflora* stands 15

Asadi H, Hosseini SM, Esmailzadeh O, Baskin CC  
Persistent soil seed banks in old-growth Hyrcanian Box tree (*Buxus hyrcana*) stands in northern Iran 23

Osono T, Trofymow JA  
Microfungal diversity associated with *Kindbergia oregana* in successional forests of British Columbia 35

Martinez-Duro E, Luzuriaga AL, Ferrandis P, Escudero A, Herranz JM  
Does aboveground vegetation composition resemble soil seed bank during succession in specialized vegetation on gypsum soil? 43

Tobo S, Takeuchi Y, Hori M  
Morphological asymmetry and behavioral laterality in the crayfish, *Procambarus clarkii* 53

Larreguy C, Carrera AL, Bertiller MB  
Production and turnover rates of shallow fine roots in rangelands of the Patagonian Monte, Argentina 61

Kagata H, Ohgushi T  
Non-additive effects of leaf litter and insect frass mixture on decomposition processes 69

Serrano Ferron E, Verheyden H, Hummel J, Cargnelutti B, Lourtet B, Merlet J, González-Candela M, Angibault JM, Hewison AJM, Clauss M  
Digestive plasticity as a response to woodland fragmentation in roe deer 77

Perot T, Picard N  
Mixture enhances productivity in a two-species forest: evidence from a modeling approach 83

Roiloa SR, Retuerto R  
Clonal integration in *Fragaria vesca* growing in metal-polluted soils: parents face penalties for establishing their offspring in unsuitable environments 95

Wang Z, Schaefer HM  
Resting orientation enhances prey survival on strongly structured background 107

Ma J-Y, Sun W, Sun H-L, Wang S-M  
Stable carbon isotope characteristics of desert plants in the Junggar Basin, China 115

Takahashi K, Okuhara I  
Comparison of climatic effects on radial growth of evergreen broad-leaved trees at their northern distribution limit and co-dominating deciduous broad-leaved trees and evergreen conifers 125

Tsujino M, Takahashi KH  
Natural genetic variation in fluctuating asymmetry of wing shape in *Drosophila melanogaster* 133

Roiloa SR, Hutchings MJ  
The effects of rooting frequency and position of rooted ramets on plasticity and yield in a clonal species: an experimental study with *Glechoma hederacea* 145

Jana G, Chaki KK, Misra KK  
Quantitative estimation of insect diversity inhabiting *Calotropis procera* in industrial and nonindustrial areas of West Bengal, India 153

Sánchez-Vilas J, Retuerto R  
Response of the sexes of the subdioecious plant *Honckenya peploides* to nutrients under different salt spray conditions 163

Kobori H, Kamamoto T, Nomura H, Oka K, Primack R  
The effects of climate change on the phenology of winter birds in Yokohama, Japan 173

Lang AC, Härdtle W, Bruelheide H, Kröber W, Schröter M, von Wehrden H, von Oheimb G  
Horizontal, but not vertical canopy structure is related to stand functional diversity in a subtropical slope forest 181

Fraschina J, León VA, Busch M  
Long-term variations in rodent abundance in a rural landscape of the Pampas, Argentina 191

Eriksson BK, Rubach A, Batsleer J, Hillebrand H  
Cascading predator control interacts with productivity to determine the trophic level of biomass accumulation in a benthic food web 203

Fukasawa Y, Osono T, Takeda H  
Fungal decomposition of woody debris of *Castanopsis sieboldii* in a subtropical old-growth forest 211

Abe SS, Kotegawa T, Onishi T, Watanabe Y, Wakatsuki T  
Soil particle accumulation in termite (*Macrotermes bellicosus*) mounds and the implications for soil particle dynamics in a tropical savanna Ultisol 219
