

Agricultural and Forest Entomology

Volume 14, Number 2, May 2012

Contents

Original Articles

- 119 Population structure of the pecan nut casebearer *Acrobasis nuxvorella* throughout its geographical distribution
Emilie A. Hartfield, Marvin K. Harris and Raul F. Medina
- 127 Distribution of cryptic blue oat mite species in Australia: current and future climate conditions
Matthew P. Hill, Ary A. Hoffmann, Stuart A. McColl and Paul A. Umina
- 139 Asian chestnut gall wasp in Tuscany: gall characteristics, egg distribution and chestnut cultivar susceptibility
Tiziana Panzavolta, Matteo Bracalini, Francesco Croci, Carlo Campani, Tamaro Bartoletti, Giuditta Miniati, Stefano Benedettelli and Rizio Tiberi
- 147 Historical distribution of the oak processionary moth *Thaumetopoea processionea* in Europe suggests recolonization instead of expansion
Frans Groenen and Nicolas Meurisse
- 157 Oviposition and feeding behaviour by the vine weevil *Otiorhynchus sulcatus* on red raspberry: effects of cultivars and plant nutritional status
Katherine E. Clark, Susan E. Hartley, Rex M. Brennan, Katrin MacKenzie and Scott N. Johnson
- 165 Abundance of pest and benign Cerambycidae both increase with decreasing forest productivity
Kapil R. Raje, Hossam E. M. Abdel-Moniem, Lenny Farlee, Virginia R. Ferris and Jeffrey D. Holland
- 171 Microdot technology for individual marking of small arthropods
Michael R. Whitehead and Rod Peakall
- 177 Aphids in a changing world: testing the plant stress, plant vigour and pulsed stress hypotheses
Muhammad Tariq, Denis J. Wright, John T. Rossiter and Joanna T. Staley
- 187 Evidence of interaction between *Sirex noctilio* and other species inhabiting the bole of *Pinus*
Kathleen Ryan, Peter de Groot and Sandy M. Smith
- 197 Population genetics of *Tuberolachnus salignus*, an obligate parthenogenetic aphid
Gudbjorg I. Aradottir, Steven J. Hanley, C. Matilda Collins, Kevin J. Dawson, Angela Karp, Simon R. Leather, Ian Shield and Richard Harrington
- 207 Attraction to monoterpenes and beetle-produced compounds by syntopic *Ips* and *Dendroctonus* bark beetles and their predators
Richard W. Hofstetter, Monica L. Gaylord, Sharon Martinson and Michael R. Wagner
- 217 Protected raspberry production alters aphid–plant interactions but not aphid population size
Scott N. Johnson, Mark W. Young and Alison J. Karley
