

CONTENTS

Articles

- 115 Genetic polymorphisms in bovine *transferrin receptor 2 (TFR2)* and *solute carrier family 40 (iron-regulated transporter), member 1 (SLC40A1)* genes and their association with beef iron content  
*Q Duan, R G Tait Jr, M S Mayes, D J Garrick, Q Liu, A L Van Eenennaam, R G Mateescu, D L Van Overbeke, A J Garmyn, D C Beitz, J M Reecy*
- 123 Association studies in QTL regions linked to bovine trypanotolerance in a West African crossbred population  
*G K Dayo, M Gautier, D Berthier, J P Poivey, I Sidibe, Z Bengaly, A Eggen, D Boichard, S Thevenon*
- 133 Optimal use of regression models in genome-wide association studies  
*J E Powell, A Kranis, J Floyd, J C M Dekkers, S Knott, C S Haley*
- 144 Transcriptome profile analysis of porcine adipose tissue by high-throughput sequencing  
*X J Li, H Yang, G X Li, G H Zhang, J Cheng, H Guan, G S Yang*
- 153 PGC-1 $\alpha$  encoded by the *PPARGC1A* gene regulates oxidative energy metabolism in equine skeletal muscle during exercise  
*S S Eivers, B A McGivney, J Gu, D E MacHugh, L M Katz, E W Hill*
- 163 Complex traits analysis of chicken growth using targeted genetical genomics  
*C P Cabrera, I C Dunn, M Fell, P W Wilson, D W Burt, D Waddington, R Talbot, P M Hocking, A Law, S Knott, C S Haley, D J de Koning*
- 172 A global analysis of molecular markers and phenotypic traits in local chicken breeds in Taiwan  
*C S Chang, C F Chen, C Berthouly-Salazar, O Chazara, Y P Lee, C M Chang, K H Chang, B Bed'Hom, M Tixier-Boichard*
- 183 Quantitative trait loci segregating in crosses between New Hampshire and White Leghorn chicken lines: I. egg production traits  
*Z S Goraga, M K Nassar, G A Brockmann*
- 190 Systems genetics approach reveals candidate genes for parasite resistance from quantitative trait loci studies in agricultural species  
*B L Sayre, G C Harris*
- 199 A functional genomic approach to the study of the milking ability in dairy sheep  
*S Dhorne-Pollet, C Robert-Granié, M R Aurel, C Marie-Etancelin*

Short Communications

- 210 A molecular study of congenital erythropoietic porphyria in cattle  
*J S Agerholm, P W Thulstrup, M J Bjerrum, C Bendixen, C B Jørgensen, M Fredholm*
- 216 A region on BTA14 that includes the positional candidate genes *LYPLA1*, *XKR4* and *TMEM68* is associated with feed intake and growth phenotypes in cattle  
*A K Lindholm-Perry, L A Kuehn, T P L Smith, C L Ferrell, T G Jenkins, H C Freetly, W M Snelling*

*Contents continued*

- 220 Validation and fine mapping of a QTL for ovulation rate on swine chromosome 3  
*M R Mousel, K A Leymaster, R K Christenson, D J Nonneman, G A Rohrer*
- 225 Fine mapping of porcine SSC14 QTL and SCD gene effects on fatty acid composition and melting point of fat in a Duroc purebred population  
*Y Uemoto, H Nakano, T Kikuchi, S Sato, M Ishida, T Shibata, H Kadowaki, E Kobayashi, K Suzuki*
- 229 SNP identification and polymorphism analysis in exon 2 of the horse *myostatin* gene  
*E E Baron, M S Lopes, D Mendonça, A da Câmara Machado*
- 233 Significant associations of polymorphisms in the *prolactin* gene with growth traits in Asian seabass (*Lates calcarifer*)  
*X P He, J H Xia, C M Wang, H Y Pang, G H Yue*

Brief Note

- 237 Polymorphic but highly conserved *Bogr-DRA* gene in yak (*Bos grunniens*)  
*T W An, H Zhang, J W He, H Y Feng, Y Z Luo, J L Han*
- 238 Corrigendum
