Original Articles

- 425 *M. Fahim, A. Mechanicos, L. Ayala-Navarrete, S. Haber and P. J. Larkin*
Resistance to *Wheat streak mosaic virus* – a survey of resources and development of molecular markers
- 441 *M. Ben Khalifa, V. Simon, H. Fakhfakh and B. Moury*
Tunisian *Potato virus Y* isolates with unnecessary pathogenicity towards pepper: support for the matching allele model in eIF4E resistance–potyvirus interactions
- 448 *K. Velázquez, J. A. Pina, L. Navarro, P. Moreno and J. Guerri*
Association of citrus psorosis B symptoms with a sequence variant of the *Citrus psorosis virus* RNA 2
- 457 *S. J. C. Silva, G. P. Castillo-Urquiza, B. T. Hora-Júnior, I. P. Assunção, G. S. A. Lima, G. Pio-Ribeiro, E. S. G. Mizubuti and F. M. Zerbini*
Species diversity, phylogeny and genetic variability of begomovirus populations infecting leguminous weeds in northeastern Brazil
- 468 *F. M. Gil-Salas, J. Peters, N. Boonham, I. M. Cuadrado and D. Janssen*
Co-infection with *Cucumber vein yellowing virus* and *Cucurbit yellow stunting disorder virus* leading to synergism in cucumber
- 479 *M. Golmohammadi, P. Llop, G. Scuderi, I. Gell, J. H. Graham and J. Cubero*
mRNA from selected genes is useful for specific detection and quantification of viable *Xanthomonas citri* subsp. *citri*
- 489 *J. Adriko, V. Aritua, C. N. Mortensen, W. K. Tushemereirwe, J. Kubiriba and O. S. Lund*
Multiplex PCR for specific and robust detection of *Xanthomonas campestris* pv. *musacearum* in pure culture and infected plant material
- 498 *S. Nabhan, K. Wydra, M. Linde and T. Debener*
The use of two complementary DNA assays, AFLP and MLSA, for epidemic and phylogenetic studies of pectolytic enterobacterial strains with focus on the heterogeneous species *Pectobacterium carotovorum*
- 509 *G. K. Kumaraswamy, A. C. Kushalappa, T. M. Choo, Y. Dion and S. Rioux*
Differential metabolic response of barley genotypes, varying in resistance, to trichothecene-producing and -nonproducing (*tri5*⁻) isolates of *Fusarium graminearum*
- 522 *A.-L. Boutigny, I. Beukes, I. Small, S. Zühlke, M. Spiteller, B. J. Van Rensburg, B. Flett and A. Viljoen*
Quantitative detection of *Fusarium* pathogens and their mycotoxins in South African maize
- 532 *M. Bani, D. Rubiales and N. Rispaïl*
A detailed evaluation method to identify sources of quantitative resistance to *Fusarium oxysporum* f. sp. *pisi* race 2 within a *Pisum* spp. germplasm collection
- 543 *E. F. Boys, S. E. Roques, J. S. West, C. P. Werner, G. J. King, P. S. Dyer and B. D. L. Fitt*
Effects of R gene-mediated resistance in *Brassica napus* (oilseed rape) on asexual and sexual sporulation of *Pyrenopeziza brassicae* (light leaf spot)

Contents continued from outside back cover

- 555 T. D. Miles, J. F. Hancock, P. Callow and
A. M. C. Schilder

Evaluation of screening methods and fruit
composition in relation to anthracnose fruit rot
resistance in blueberries

- 567 R. W. Rees, J. Flood, Y. Hasan, M. A. Wills
and R. M. Cooper

Ganoderma boninense basidiospores in oil palm
plantations: evaluation of their possible role in stem
rots of *Elaeis guineensis*

- 579 D. Hüberli, K. J. Hayden, M. Calver and
M. Garbelotto

Intraspecific variation in host susceptibility and
climatic factors mediate epidemics of sudden oak
death in western US forests

- 593 B. D. Gossen, K. K. C. Adhikari and
M. R. McDonald

Effects of temperature on infection and subsequent
development of clubroot under controlled
conditions

- 600 J. G. Vicente, N. D. Gunn, L. Bailey, D. A. C. Pink
and E. B. Holub

Genetics of resistance to downy mildew in *Brassica
oleracea* and breeding towards durable disease
control for UK vegetable production

- 610 N. J. Grünwald, S. Werres, E. M. Goss,
C. R. Taylor and V. J. Fieland

Phytophthora obscura sp. nov., a new species of
the novel *Phytophthora* subclade 8d
