

CONTENTS

ARTICLES

- The critical role of allergen-specific IgE, IgG4 and IgA antibodies in the tolerance of IgE-mediated food sensitisation in primary school children
Kong-Sang Wan, Hsin-Lin Wu, Winnie Yang, Keh-Gong Wu, Tsee-Chung Wu and Betau Hwang 93
- Inter-laboratory comparison of Cry1Ab toxin quantification in *MON 810* maize by enzyme-immunoassay
András Székács, Gabriele Weiss, David Quist, Eszter Takács, Béla Darvas, Matthias Meier, Trilochan Swain and Angelika Hilbeck 99
- Isolation and characterisation of deoxynivalenol affinity binders from a phage display library based on single-domain camelid heavy chain antibodies (VHHs)
Zhui Tu, Yang Xu, Qinghua He, Jinheng Fu, Xia Liu and Yong Tao 123
- A reliable immunoturbidimetry method for immunoglobulin G in bovine colostrum
Maojun Jin, Hua Shao, Zhanmei Jiang, Fen Jin, Tianjin Chen and Jing Wang 133
- Preparation of synthetic antigen and monoclonal antibody for indirect competitive ELISA of citrinin
Yongning Li, Yuanyuan Wang and Yanghao Guo 145
- Production of the class-specific antibody and development of direct competitive ELISA for multi-residue detection of organophosphorus pesticides
Bing Liu, Yu Ge, Yan Zhang, Yang Song, Yanyan Lv, Xiaoxue Wang and Shuo Wang 157
- Double antibody sandwich enzyme linked immunoassay and rapid Immunoswab assay for detection of gliadin in food
Hoon H. Sunwoo, Naiyana Gujral, Susan Lutz and Mavanur Suresh 169
- Immunomodulatory effects of dead *Lactobacillus* on murine splenocytes and macrophages
Shen-Shih Chiang, Chin-Feng Liu, Kuo-Chuan Tseng, Jeng-Leun Mau and Tzu-Ming Pan 183
