

Biological interactions

- 315 L. P. CANELLAS, L. B. DOBSS, A. L. OLIVEIRA, J. G. CHAGAS, N. O. AGUIAR, V. M. RUMJANEK, E. H. NOVOTNY, F. L. OLIVARES, R. SPACCINI AND A. PICCOLO
Chemical properties of humic matter as related to induction of plant lateral roots
- 325 X. CHANG, S. WANG, C. LUO, Z. ZHANG, J. DUAN, X. ZHU, Q. LIN AND B. XU
Responses of soil microbial respiration to thermal stress in alpine steppe on the Tibetan plateau
- 332 X. ZHOU, G. YU AND F. WU
Soil phenolics in a continuously mono-cropped cucumber (*Cucumis sativus* L.) system and their effects on cucumber seedling growth and soil microbial communities

Carbon and organic matter

- 341 R. H. CONG, X. J. WANG, M. G. XU, W. J. ZHANG, L. J. XIE, X. Y. YANG, S. M. HUANG AND B. R. WANG
Dynamics of soil carbon to nitrogen ratio changes under long-term fertilizer addition in wheat-corn double cropping systems of China
- 351 E. SUUSTER, C. RITZ, H. ROOSTALU, R. KÖLLI AND A. ASTOVER
Modelling soil organic carbon concentration of mineral soils in arable land using legacy soil data
- 360 Z. F. XU, X. Z. PU, H. J. YIN, C. Z. ZHAO, Q. LIU AND F. Z. WU
Warming effects on the early decomposition of three litter types, Eastern Tibetan Plateau, China

Physical processes and functions

- 368 K. ASADA, Y. YABUSHITA, H. SAITO AND T. NISHIMURA
Effect of long-term swine-manure application on soil hydraulic properties and heavy metal behaviour

Chemical processes and functions

- 377 S. C. LÖHR AND M. E. COX
The influence of vegetation and soil type on the speciation of iron in soil water
- 389 N. J. BARROW, G. W. BRÜMMER AND L. FISCHER
Rate of desorption of eight heavy metals from goethite and its implications for understanding the pathways for penetration
- 399 N. BORCHARD, K. PROST, T. KAUTZ, A. MOELLER AND J. SIEMENS
Sorption of copper (II) and sulphate to different biochars before and after composting with farmyard manure

Soil development, variability, characterization and distribution

- 410 H. YANG, B. KUANG AND A. M. MOUAZEN
Quantitative analysis of soil nitrogen and carbon at a farm scale using visible and near infrared spectroscopy coupled with wavelength reduction

Continued from outside back cover

421 B. KUANG AND A. M. MOUAZEN

Influence of the number of samples on prediction error of visible and near infrared spectroscopy of selected soil properties at the farm scale

430 Book reviews

433 Reviewers list

A summary of the Instructions to Authors is printed from time-to-time inside the back cover of the journal.
