

CONTENTS

A. DE GELDER, J.A. DIELEMAN, G.P.A. BOT and L.F.M. MARCELIS: An overview of climate and crop yield in closed greenhouses	193–202
Y. KANAYAMA, K. KATO, T. STOB DAN, G.G. GALITSYN, A.V. KOCHETOV and K. KANAHAMA: Research progress on the medicinal and nutritional properties of sea buckthorn (<i>Hippophae rhamnoides</i>) – a review	203–210
S. SHRESTHA, R. KUMAR, T.K. BEHERA and H.K. SHARMA: Inheritance of resistance to root-knot nematode (<i>Meloidogyne incognita</i> race 1) in tomato (<i>Solanum lycopersicum</i> L.) ‘Pusa 120’	211–216
MOSTAFA M. RADY: Effects of seed pre-treatment with a calcium paste on the growth, phytohormone content, and enzyme activities in bean (<i>Phaseolus vulgaris</i> L.) seedlings grown under high NaCl stress	217–222
TERESA ORLIKOWSKA, MARTA ZAWADZKA, ELŻBIETA ZENKTELER and PIOTR SOBICZEWSKI: Influence of the biocides PPM™ and Vitrofuraf on bacteria isolated from contaminated plant tissue cultures and on plant microshoots grown on various media	223–230
APITA BUNSIRI, ROBERT E. PAULL and SAICHOL KETSA: Increased activities of phenylalanine ammonia lyase, peroxidase, and cinnamyl alcohol dehydrogenase in relation to pericarp hardening after physical impact in mangosteen (<i>Garcinia mangostana</i> L.)	231–236
G. VULETIN SELAK, S. PERICA, S. GORETA BAN, L. BUCAN and M. POLJAK: Flower sterility and the germination ability of pollen as genetic traits of seven olive (<i>Olea europaea</i> L.) cultivars grown in Croatia	237–242
L.F. SHANGGUAN, C. WANG, E. KAYESH, Y.P. ZHANG, N.K. KORIR, J. HAN and J.G. FANG: Review and structural analysis of the evolution of grapevine (<i>Vitis vinifera</i> L.) genes involved in flower and fruit development	243–249
M. LI, M.L. YU, Z.Q. ZHANG, Z.G. LIU and Y. PAN: Control of black spot disease caused by <i>Alternaria alternata</i> on jujube (<i>Ziziphus jujuba</i> Mill. cv. Dongzao) using Harpin _{X₀₀} protein	250–254
TEKALIGN WONDIMU, TILEYE FEYISSA and GIRMA BEDADA: Meristem culture of selected sweet potato (<i>Ipomoea batatas</i> L. Lam.) cultivars to produce virus-free planting material	255–260
GRAZIA MARINO and FRANCESCA GAGGIA: Effects of medium composition and the sealing material used for Petri dishes on the growth of callus of <i>Melia azedarach</i> L.	261–265
P.P. WANG, T. SHI, W.B. ZHUANG, Z. ZHANG and Z.H. GAO: Determination of <i>S-RNase</i> genotypes and isolation of four novel <i>S-RNase</i> genes in Japanese apricot (<i>Prunus mume</i> Sieb. et Zucc.) native to China	266–270
A. SALEEM, M. ASHRAF, N.A. AKRAM and F. AL-QURAINY: Salinity-induced changes in key anti-oxidant enzyme activities and in the levels of some anti-oxidants, osmo-protectants, inorganic ions, and chlorophyll pigments in okra fruit (<i>Abelmoschus esculentus</i> L.)	271–277
R.R. SHARMA, M.J. JHALEGAR and R.K. PAL: Response of kiwifruit (<i>Actinidia deliciosa</i> cv. Allison) to post-harvest treatment with 1-methylcyclopropene	278–284
BOOK REVIEW	285–286
