

# WEED RESEARCH

## Research Papers

- 297 *A Hussner* Alien aquatic plant species in European countries
- 307 *P R Westerman, M Heiermann, U Pottberg, B Rodemann & B Gerowitt* Weed seed survival during mesophilic anaerobic digestion in biogas plants
- 317 *Y M Zhu, Y D Li, N Colbach, K P Ma, W Wei & X C Mi* Seed losses at harvest and seed persistence of oilseed rape (*Brassica napus*) in different cultural conditions in Chinese farming systems
- 327 *J Rasmussen, H W Griepentrog, J Nielsen & C B Henriksen* Automated intelligent rotor tine cultivation and punch planting to improve the selectivity of mechanical intra-row weed control
- 338 *L O Brandsæter, K Mangerud & J Rasmussen* Interactions between pre- and post-emergence weed harrowing in spring cereals
- 348 *L S Jung, R L Eckstein, A Otte & T W Donath* Above- and below-ground nutrient and alkaloid dynamics in *Colchicum autumnale*: optimal mowing dates for population control or low hay toxicity
- 358 *H H Ratnayaka, W T Molin & T M Sterling* Comparison of physiological and antioxidant responses of *Anoda cristata* and cotton to progressive drought
- 367 *J Gherekhloo, M D Osuna & R DE Prado* Biochemical and molecular basis of resistance to ACCase-inhibiting herbicides in Iranian *Phalaris minor* populations
- 373 *S Otto, V P Vasileiadis, R Masin & G Zanin* Evaluating weed diversity with indices of varying complexity in north-eastern Italy
- 383 *B Borgy, S Gaba, S Petit & X Reboud* Non-random distribution of weed species abundance in arable fields
