

Contents

Letter

- 2389 **Refugia: keys to climate change management**
Gunnar Keppel and Grant W. Wardell-Johnson

Reviews

- 2392 **Climate change and health with an emphasis on interactions with ultraviolet radiation: a review**
Peter Thomas, Ashwin Swaminathan and Robyn M. Lucas
- 2406 **Global environmental change and the biology of heritage structures**
Heather A. Viles and Nick A. Cutler

Primary Research Articles

- 2419 **Wrong place, wrong time: climate change-induced range shift across fragmented habitat causes maladaptation and declined population size in a modelled bird species**
Marleen M. P. Cobben, Jana Verboom, Paul F. M. Opdam, Rolf F. Hoekstra, René Jochem and Marinus J. M. Smulders
- 2429 **Temperature-related shifts in butterfly phenology depend on the habitat**
Florian Altermatt
- 2439 **Temporal variation in responses of species to four decades of climate warming**
Louise Mair, Chris D. Thomas, Barbara J. Anderson, Richard Fox, Marc Botham and Jane K. Hill
- 2448 **Traits explain community disassembly and trophic contraction following experimental environmental change**
Zoë Lindo, Jonathan Whiteley and Andrew Gonzalez
- 2458 **Conserving energy at a cost to biodiversity? Impacts of LED lighting on bats**
Emma L. Stone, Gareth Jones and Stephen Harris
- 2466 **Noncalcifying larvae in a changing ocean: warming, not acidification/hypercapnia, is the dominant stressor on development of the sea star *Meridiastra calcar***
Hong D. Nguyen, Steve S. Doo, Natalie A. Soars and Maria Byrne
- 2477 **Influence of climate oscillations on dentinal deposition in teeth of Commerson's dolphin**
Natalia A. Dellabianca, Aleta A. Hohn, R. Natalie P. Goodall, Jorge L. Pousa, Colin D. Macleod and Mauricio Lima
- 2487 **Migrate or stay: terrestrial primary productivity and climate drive anadromy in Arctic char**
Anders G. Finstad and Catherine L. Hein
- 2498 **Climate shifts the interaction web of a marine plankton community**
Tessa B. Francis, Mark D. Scheuerell, Richard D. Brodeur, Phillip S. Levin, James J. Ruzicka, Nick Tolimieri and William T. Peterson
- 2509 **Increased freshwater discharge shifts the trophic balance in the coastal zone of the northern Baltic Sea**
Johan Wikner and Agneta Andersson
- 2520 **Four years of experimental climate change modifies the microbial drivers of N₂O fluxes in an upland grassland ecosystem**
Amélie A. M. Cantarel, Juliette M. G. Bloor, Thomas Pommier, Nadine Guillaumaud, Caroline Moirrot, Jean-François Soussana and Franck Poly

Contents (*continued*)

- 2532 **Net ecosystem exchange modifies the relationship between the autotrophic and heterotrophic components of soil respiration with abiotic factors in prairie grasslands**
Nuria Gomez-Casanovas, Roser Matamala, David R. Cook and Miquel A. Gonzalez-Meler
- 2546 **No significant nitrous oxide emissions during spring thaw under grazing and nitrogen addition in an alpine grassland**
Kaihui Li, Yanming Gong, Wei Song, Jinling Lv, Yunhua Chang, Yukun Hu, Changyan Tian, Peter Christie and Xuejun Liu
- 2555 **Using model-data fusion to interpret past trends, and quantify uncertainties in future projections, of terrestrial ecosystem carbon cycling**
Trevor F. Keenan, Eric Davidson, Antje M. Moffat, William Munger and Andrew D. Richardson
- 2570 **Carbon dioxide exchange over multiple temporal scales in an arid shrub ecosystem near La Paz, Baja California Sur, Mexico**
Tom W. Bell, Olaf Menzer, Enrique Troyo-Diéquez and Walter C. Oechel
- 2583 **Increased temperature and altered summer precipitation have differential effects on biological soil crusts in a dryland ecosystem**
Shannon L. Johnson, Cheryl R. Kuske, Travis D. Carney, David C. Housman, La Verne Gallegos-Graves and Jayne Belnap
- 2594 **Long-term carbon storage through retention of dissolved aromatic acids by reactive particles in soil**
Marc G. Kramer, Jonathan Sanderman, Oliver A. Chadwick, Jon Chorover and Peter M. Vitousek
- 2606 **Dynamics of soil carbon following destruction of tropical rainforest and the subsequent establishment of *Imperata* grassland in Indonesian Borneo using stable carbon isotopes**
Yusuke Yonekura, Seiichi Ohta, Yoshiyuki Kiyono, Darul Aksa, Kazuhito Morisada, Nagaharu Tanaka and Ichiro Tayasu
- 2617 **The effect of experimental warming and precipitation change on proteolytic enzyme activity: positive feedbacks to nitrogen availability are not universal**
Edward R. Brzostek and Adrien C. Finzi
- 2626 **Nitrogen deposition drives lichen community changes through differential species responses**
Otilia Johansson, Kristin Palmqvist and Johan Olofsson
- 2636 **The relative importance of deforestation, precipitation change, and temperature sensitivity in determining the future distributions and diversity of Amazonian plant species**
Kenneth J. Feeley, Yadvinder Malhi, Przemyslaw Zelazowski and Miles R. Silman
- 2648 **Disregarding the edaphic dimension in species distribution models leads to the omission of crucial spatial information under climate change: the case of *Quercus pubescens* in France**
Romain Bertrand, Vincent Perez and Jean-Claude Gégout
- 2661 **Cassava about-FACE: Greater than expected yield stimulation of cassava (*Manihot esculenta*) by future CO₂ levels**
David M. Rosenthal, Rebecca A. Slattery, Rebecca E. Miller, Aleel K. Grennan, Timothy R. Cavagnaro, Claude M. Fauquet, Roslyn M. Gleadow and Donald R. Ort
- Corrigendum**
- 2676 **Variation in soil carbon stocks and their determinants across a precipitation gradient in West Africa**
Gustavo Saiz, Michael I. Bird, Tomas Domingues, Franziska Schrodte, Michael Schwarz, Ted R. Feldpausch, Elmar Veenendaal, Gloria Djabbletey, Fidele Hien, Halidou Compaore, Adama Diallo and Jon Lloyd
