

RESEARCH ARTICLE

- 511 **Effect of resistant starch (RS3) addition on rheological properties of wheat flour** S.-R. Hong and B. Yoo
- 517 **Starch properties of malted barley in relation to real degree of fermentation** J. Patindol, G. Mendez-Montealvo and Y.-J. Wang
- 524 **Effects of protein hydrolysis on pasting properties of wheat flour** J.-s. Chen, J.-c. Tian, F.-f. Zheng, X.-c. Li, Y. Zhao, X.-b. Gao and X.-l. Zhang
- 531 **Comparison of starches separated from different *Dioscorea bulbifera* Linn. cultivars** Q. Jiang, W. Gao, X. Li, H. Wang, Y. Xia and P. Xiao
- 538 **New insights into loss of swelling power and pasting profiles of acid hydrolyzed starch granules** S. Wang and L. Copeland
- 545 **Physicochemical, morphological, and thermal properties of starches separated from bulbs of four Chinese lily cultivars** X. Li, W. Gao, Q. Jiang and Y. Xia
- 552 **The effect of modified starches on the adsorption of cigarette mainstream smoke composition** L. Guo, Y. Zhu and X. Du
- 563 **Suppression of *Fusarium graminearum* growth by differently structured starch types** J. T. Svensson, J. J. Olas, R. Skibior, H. Giese and A. Blennow
- 572 **Physicochemical, morphological, structural, and thermal characteristics of starches separated from *Bulbus fritillaria* of different cultivars** X. Li, W. Gao, Q. Jiang, J. Hao, X. Guo and L. Huang

Contents

Volume 64, No. 8, August 2012

RESEARCH ARTICLE

- 581 **Study on properties of *Cyperus esculentus* starch grown in Xinjiang, China** S. Jing, X. Yan, W. Ouyang, H. Xiang and Z. Ren
- 590 **Facile preparation of sago starch esters using full factorial design of experiment** F. E. Soetaredjo, S. Ismadji, L. H. Huynh, N. S. Kasim, N. Y. Tran-Thi, A. Ayucitra and Y.-H. Ju
- 598 **Determination of structural changes in microwaved rice starch using Fourier transform infrared and Raman spectroscopy** D. Fan, W. Ma, L. Wang, J. Huang, J. Zhao, H. Zhang and W. Chen
- 607 **6-Gingerol inhibits fungal alpha amylase: Enzyme kinetic and molecular modeling studies** I. Tintu, K. V. Dileep, C. Remya, A. Augustine, and C. Sadasivan
- 613 **Synthesis and characterization of hydrophobically modified starch by ring opening polymerization using imidazole as catalyst** A. Zerroukhi, T. Jeanmaire, C. Raveyre, and A. Ainser
- 621 **Physico-chemical characterization of starches extracted from potatoes of the group Phureja** M. Cáceres, C. Mestres, B. Pons, O. Gibert, W. Amoros, E. Salas, D. Dufour, M. Bonierbale and D. Pallet
- 631 **Milling of rice grains: The roles of starch structures in the solubility and swelling properties of rice flour** J. Hasjim, E. Li and S. Dhital
- ## SHORT COMMUNICATION
- 646 **Evidence for the improvement of thermostability of the maltogenic α -amylase of *Aspergillus niger* by negative pressure** R. Herale, U.-K. Sukumaran and R.-K. Kadeppagari
- 652 **Treatment of wx corn starch dispersions in a microwave reactor and their hydrodynamic properties determined using asymmetrical flow field-flow fractionation** S. Juna, M. Damm, C. O. Kappe and A. Huber
-

RESEARCH ARTICLE

- 657 **Effect of Maillard reaction products prepared from glucose-glycine model systems on starch digestibility** S. Y. Chung, S. H. Han, S. W. Lee and C. Rhee
- 665 **Effect of native and acetylated-crosslinked waxy corn starch-beeswax coatings on quality attributes of raspberries during storage** A. Pérez-Gallardo, S. D. Mattinson, A. Lazcano-Peralta, J. K. Fellman, G. Barbosa-Cánovas, B. García-Almendárez and C. Regalado
