DISEASES

- Short communication. Proposed “life cycle” of carnation small viroid-like RNA
E. Balázs and Krisztina Hegedüs 1
- Inactivation of the *mat1-2-1* mating type gene results in reduced asexual sporulation and *con10* expression in *Fusarium verticillioides*
Á. M. Bodor, E. D. Nagygyörgy and L. Hornok 7
- Evaluation of natural products for the management of damping-off of tomato incited by *Pythium aphanidermatum* (Edson) Fitz
K. E. Sivaprakash, M. Senthil, J. Raja, V. Kurucheve and G. Sangeetha..... 17
- Physiological and pathological aspects of some new isolates of *Colletotrichum falcatum* causing red rot disease in *Saccharum* spp. complex
Y. P. Bharti, S. K. Vishwakarma, A. Kumar, Atul Singh, M. L. Sharma and D. N. Shukla 35

INSECT PESTS

- Molecular diagnosis of two closely related mealybug species (Hemiptera: Pseudococcidae)
I. Tobiás, F. Kozár and M. B. Kaydan..... 51
- Monitoring quarantine pine wood nematode, *Bursaphelenchus xylophilus* in Hungary
Ágnes Tóth, Mariann Elekes and J. Kiss..... 55
- Changes in the species composition of thrips on *Trifolium repens* (Fabales)
Yong-Hui Xie, Zheng-Yue Li, Kun Dong and Hong-Rui Zhang 61
- Two leafhopper species new to the fauna of Hungary (Hemiptera: Cicadomorpha: Cicadellidae)
S. Koczor, B. Kiss, É. Szita and K. Fetykó..... 69
- New Psyllid records from Hungary (Hemiptera: Psylloidea)
G. Ripka 75

PAPERS PRESENTED at the THIRD SYMPOSIUM on PALAEARCTIC
THYSANOPTERA

First investigation of species composition of Thysanoptera inhabiting alfalfa based on their second stage larvae <i>R. Ábrahám</i>	81
The pupation behaviour of the Western flower thrips, <i>Frankliniella occidentalis</i> (Pergande) <i>Neil D. Holmes, Jude A. Bennison, Kerry A. Maulden and W. D. J. Kirk</i>	87
Host range and number of generations of pea thrips (<i>Kakothrips pisivorus</i> Westwood, 1880) (Thysanoptera: Thripidae) in Hungary <i>G. Jenser, Asztéria Almási and I. Tóbiás</i>	97
Biological studies and new agronomical developments to reduce the epidemics of <i>Tomato spotted wilt virus</i> (TSWV) in tobacco plantations in Hungary <i>G. Jenser, L. Bujdos, R. Gáborjányi, Asztéria Almási, Ágnes Szénási and T. Fekete</i>	103
Influence of climate change on the potential for establishment of <i>Frankliniella occidentalis</i> (Thysanoptera: Thripidae) in Bulgaria <i>V. Krumov and O. Karadjova</i>	113
Notes on sex ratio and reproductive modes in field populations of two pest thrips species (Thysanoptera, Thripidae) in Italy <i>R. Marullo and A. De Grazia</i>	117
Fighting behaviour of male Western flower thrips, <i>Frankliniella occidentalis</i> (Pergande) <i>O. A. Olaniran and W. D. J. Kirk</i>	125
Flower stage and position affect population estimates of the Western flower thrips, <i>Frankliniella occidentalis</i> (Pergande), in strawberry <i>Clare Sampson and W. D. J. Kirk</i>	133
Comparative morphology of the second larval instar of <i>Haplothrips setiger</i> , <i>H. jasionis</i> and <i>H. staites</i> (Thysanoptera, Phlaeothripidae) <i>K. Stanislavek and H. Kucharczyk</i>	141
Effects of different diets on oviposition rate of <i>Frankliniella occidentalis</i> (Pergande) (Thysanoptera: Thripidae) <i>D. Steinbach, S. Kumm and G. Moritz</i>	151
Thysanoptera in a green roof microecosystem in Bucharest, Romania <i>Liliana Vasiliu-Oromulu, Daniela Bărbuceanu and G. Vierbergen</i>	161
Morphological identification of <i>Thrips palmi</i> in the frame of ISO/IEC 17025 <i>G. Vierbergen, J. C. Koch and A. J. M. Loomans</i>	167
