Articles

Influence of photosynthetically active radiation on diurnal N₂O emissions under ruminant urine patches
BT Das, K Hamonts, E Moltchanova, TJ Clough, LM Condrón, SA Wakelin and M O'Callaghan 319

Comparison of lysimeters and porous ceramic cups for measuring nitrate leaching in different soil types
Q Wang, K Cameron, G Buchan, L Zhao, EH Zhang, N Smith and S Carrick 333

Tillering promotion by paclobutrazol in wheat and its relationship with plant carbohydrate status
SG Assuero, M Lorenzo, NM Pérez Ramírez, LM Velázquez and JA Tognetti 347

Nutritional restriction of triplet-bearing ewes and body condition score has minimal impacts
PR Kenyon, ST Morris, RE Hickson, KJ Stafford and DM West 359

A conceptual model for the population dynamics of *Cirsium arvense* in a New Zealand pasture
DM Leathwick and GW Bourdôt 371

Effect of nutrition from mid-pregnancy to parturition on the live weight of twin-bearing hoggets and the live weight and survival of their lambs
FJ Mulvaney, ST Morris, PR Kenyon, PCH Morel and DM West 385

A review of summer-active tall fescue use and management in Australia's high-rainfall zone
MC Raeside, MA Friend, R Behrendt, AR Lawson and SG Clark 393

Short communication

Nitrate accumulation in forage brassicas
AL Fletcher and E Chakwizira 413
