

Table of Contents

Editorial

- 395 Ecosystem Services: Protecting the Commons
Richard J. Wenning and Sabine E. Apitz

Letters to the Editor

- 397 NOEC: Notable Oversight of Enlightened Canadians: A Response to van Dam et al. (2012)
Leana Van der Vliet, Lisa N Taylor, and Richard Scroggins
- 399 Canada Showing the Lead, However, We Still Have a NOEC Problem: Response to Van der Vliet et al. (2012)
Rick A van Dam, Andrew J Harford, and Michael St J Warne

Review—Global Environmental Issue

- 401 Refocusing on Nature: Holistic Assessment of Ecosystem Services
Charles A Menzie, Thomas Deardorff, Pieter Booth, and Ted Wickwire

Brief Communication

- 412 Data and Literature Gathering in Chemical Cancer Risk Assessment
Ilona Silins, Anna Korhonen, Johan Högberg, and Ulla Stenius

Special Series

- 418 Bayesian Networks in Environmental and Resource Management
David N Barton, Sakari Kuikka, Olli Varis, Laura Uusitalo, Hans Jørgen Henriksen, Mark Borsuk, Africa de la Hera, Raziye Farmani, Sandra Johnson, and John DC Linnell
- 430 Use of Bayesian Belief Networks for Dealing with Ambiguity in Integrated Groundwater Management
Hans Jørgen Henriksen, Pedro Zorrilla-Miras, Africa de la Hera, and Marcella Brugnach
- 445 Assessing the Roles of Environmental Factors in Coastal Fish Production in the Northern Baltic Sea: A Bayesian Network Application
Laura Uusitalo, Sakari Kuikka, Pirkko Kauppila, Pirkko Söderkultalahti, and Saara Bäck
- 456 An Evolutionary Bayesian Belief Network Methodology for Participatory Decision Making Under Uncertainty: An Application to Groundwater Management
Raziye Farmani, Hans Jørgen Henriksen, Dragan Savic, and David Butler
- 462 A Bayesian Network Model for Integrative River Rehabilitation Planning and Management
Mark E Borsuk, Steffen Schweizer, and Peter Reichert
- 473 Integrating Bayesian Networks and Geographic Information Systems: Good Practice Examples
Sandra Johnson, Sama Low-Choy, and Kerrie Mengersen
- 480 Integrated Bayesian Network Framework For Modeling Complex Ecological Issues
Sandra Johnson and Kerrie Mengersen
- 491 Fully Connected Bayesian Belief Networks: A Modeling Procedure with a Case Study of the Ganges River Basin
Olli Varis, Muhammad Mizanur Rahaman, and Tommi Kajander

Health & Ecological Risk Assessment

- 503 Quantifying Population-Level Risks Using an Individual-Based Model: Sea Otters, Harlequin Ducks, and the Exxon Valdez Oil Spill
Mark A Harwell, John H Gentile, and Keith R Parker

- 523 Toxicological risks to humans of toxaphene residues in fish
*Pim EG Leonards, Harrie Besselink, Jarle Klungsøyr, Brendan McHugh,
Eugene Nixon, Gerhard G Rimkus, Abraham Brouwer, and Jacob de Boer*
- 530 Predicting Concentrations of Trace Organic Compounds in Municipal Wastewater
Treatment Plant Sludge and Biosolids Using the PhATE™ Model
*Virginia L Cunningham, Vincent J D'Aco, Danielle Pfeiffer, Paul D Anderson,
Mary E Buzby, Robert E Hannah, James Jahnke, and Neil J Parke*

Environmental Policy & Regulation

- 543 Trend of Herbicide Loads in the River Rhine and its Tributaries
Martin Bach and Hans-Georg Frede
- 553 Acquisition of Polychlorinated Biphenyls (PCBs) By Pacific Chinook Salmon:
An Exploration of Various Exposure Scenarios
Bruce K Hope

Departments

- 563 Learned Discourses: Timely Scientific Opinions
- 570 Book Reviews
