

ORIGINAL PAPERS

Molecular sequence variations of the lipoxygenase-2 gene in soybean

J.H. Shin · K. Van · K.D. Kim · Y.-H. Lee · T.-H. Jun · S.-H. Lee 613

Towards the adaptation of grapevine varieties to climate change: QTLs and candidate genes for developmental stages

E. Duchêne · G. Butterlin · V. Dumas · D. Merdinoglu 623

Domestication bottlenecks limit genetic diversity and constrain adaptation in narrow-leaved lupin (*Lupinus angustifolius* L.)

J.D. Berger · B.J. Buirchell · D.J. Lockett · M.N. Nelson 637

An integrated genetic linkage map of cultivated peanut (*Arachis hypogaea* L.) constructed from two RIL populations

H. Qin · S. Feng · C. Chen · Y. Guo · S. Knapp · A. Culbreath · G. He · M.L. Wang · X. Zhang · C.C. Holbrook · P. Ozias-Akins · B. Guo 653

cDNA-AFLP-based genetical genomics in cotton fibers

M. Claverie · M. Souquet · J. Jean · N. Forestier-Chiron · V. Lepitre · M. Pré · J. Jacobs · D. Llewellyn · J.-M. Lacape 665

Identification, validation and high-throughput genotyping of transcribed gene SNPs in cassava

M.E. Ferguson · S.J. Hearne · T.J. Close · S. Wanamaker · W.A. Moskal · C.D. Town · J. de Young · P.R. Marri · I.Y. Rabbi · E.P. de Villiers 685

Identification of novel quantitative trait loci for days to ear emergence and flag leaf glaucousness in a bread wheat (*Triticum aestivum* L.) population adapted to southern Australian conditions

D. Bennett · A. Izanloo · J. Edwards · H. Kuchel · K. Chalmers · M. Tester · M. Reynolds · T. Schnurbusch · P. Langridge 697

Development of wild barley (*Hordeum chilense*)-derived DArT markers and their use into genetic and physical mapping

C. Rodríguez-Suárez · M.J. Giménez · N. Gutiérrez · C.M. Ávila · A. Machado · E. Huttner · M.C. Ramírez · A.C. Martín · A. Castillo · A. Kilian · A. Martín · S.G. Atienza 713

Quantitative trait loci involved in regulating seed oil composition in *Arabidopsis thaliana* and their evolutionary implications

A. Sanyal · C. Randal Linder 723

Multi-population QTL detection for aerial morphogenetic traits in the model legume *Medicago truncatula*

L.C. Lagunes Espinoza · T. Huguet · B. Julier 739

Using a physiological framework for improving the detection of quantitative trait loci related to nitrogen nutrition in *Medicago truncatula*

D. Moreau · J. Burstin · G. Aubert · T. Huguet · C. Ben · J.-M. Prospero · C. Salon · N. Munier-Jolain 755

Accuracy of genomic selection in European maize elite breeding populations

Y. Zhao · M. Gowda · W. Liu · T. Würschum · H.P. Maurer · F.H. Longin · N. Ranc · J.C. Reif 769

Introgression and pyramiding into common bean market class fabada of genes conferring resistance to anthracnose and potyvirus

J.J. Ferreira · A. Campa · E. Pérez-Vega · C. Rodríguez-Suárez · R. Giraldez 777
