

## Environmental change

- 1195 Synergistic effects of reserves and connectivity on ecological resilience  
*A. D. Olds, K. A. Pitt, P. S. Maxwell and R. M. Connolly*
- 1204 Grazing alters ecosystem functioning and C:N:P stoichiometry of grasslands along a regional precipitation gradient  
*Y. Bai, J. Wu, C. M. Clark, Q. Pan, L. Zhang, S. Chen, Q. Wang and X. Han*
- 1216 The role of dispersal levels, Allee effects and community resistance as zooplankton communities respond to environmental change  
*D. K. Gray and S. E. Arnott*

## Modelling for management

- 1225 Population-based threshold models describe weed germination and emergence patterns across varying temperature, moisture and oxygen conditions  
*L. G. Boddy, K. J. Bradford and A. J. Fischer*
- 1237 Carry-over effects of spring hunt and climate on recruitment to the natal colony in a migratory species  
*C. Juliet, R. Choquet, G. Gauthier, J. Lefebvre and R. Pradel*

## Conservation planning

- 1247 **EDITOR'S CHOICE: A decision framework for considering climate change adaptation in biodiversity conservation planning**  
*T. H. Oliver, R. J. Smithers, S. Bailey, C. A. Walmsley and K. Watts*
- 1256 **REVIEW: Reducing the ecological consequences of night-time light pollution: options and developments**  
*K. J. Gaston, T. W. Davies, J. Bennie and J. Hopkins*
- 1267 **REVIEW: Archive and refugia of soil organisms: applying a pedodiversity framework for the conservation of biological and non-biological heritages**  
*J. J. Ibañez, P. V. Krasilnikov and A. Saldaña*

## Control of invasives

- 1278 Effects of predator control on behaviour of an apex predator and indirect consequences for mesopredator suppression  
*L. A. Brook, C. N. Johnson and E. G. Ritchie*
- 1287 The effectiveness of classical biological control of invasive plants  
*G. D. Clewley, R. Eschen, R. H. Shaw and D. J. Wright*
- 1296 Impacts of an invasive herbivore on indigenous forests  
*A. M. Gormley, E. P. Holland, R. P. Pech, C. Thomson and B. Reddix*

## Forest management

- 1306 Competition response of European beech *Fagus sylvatica* L. varies with tree size and abiotic stress: minimizing anthropogenic disturbances in forests  
*A. Fichtner, K. Sturm, C. Rickert, W. Härdtle and J. Schrautzer*
- 1316 Do time-lagged extinctions and colonizations change the interpretation of buffer strip effectiveness? – a study of riparian bryophytes in the first decade after logging  
*K. Hylander and H. Weibull*
- 1325 Evaluating the legacy of landscape history: extinction debt and species credit in bird and small mammal assemblages in the Brazilian Atlantic Forest  
*P. K. Lira, R. M. Evers, C. Banks-Leite, R. Pardini and J. P. Metzger*

- 1334 Epiphytic bryophytes near forest edges and on retention trees: reduced growth and reproduction especially in old-growth-forest indicator species  
*S. Lobel, T. Snäll and H. Rydin*
- 1344 To what extent do time, species identity and selected plant response variables influence woody plant interactions?  
*B. Prevosto, Y. Monnier, C. Ripert and C. Fernandez*
- 1356 Human and climate influences on frequent fire in a high-elevation tropical forest  
*L. L. Yocom and P. Z. Fule*

## Agro-ecology

- 1365 Species-rich dung beetle communities buffer ecosystem services in perturbed agro-ecosystems  
*S. A. Beynon, D. J. Mann, E. M. Slade and O. T. Lewis*
- 1373 Creating patches of native flowers facilitates crop pollination in large agricultural fields: mango as a case study  
*L. G. Carneiro, C. L. Seymour, S. W. Nicolson and R. Veldtman*
- 1384 Riparian field margins: can they enhance the functional structure of ground beetle (Coleoptera: Carabidae) assemblages in intensively managed grassland landscapes?  
*L. J. Cole, S. Brocklehurst, D. A. Elston and D. I. McCracken*
- 1396 Hedgerow trees and extended-width field margins enhance macro-moth diversity: implications for management  
*T. Merckx, L. Marini, R. E. Feber and D. W. Macdonald*
- 1405 Perennial habitat fragments: parasitoid diversity and parasitism in ephemeral crops  
*D. K. Letourneau, S. G. B. Allen and J. O. Stireman III*

## Restoration

- 1417 Spontaneous succession on opencast mining sites: implications for bird biodiversity  
*M. Šálek*
- 1426 Nursery-propagated plants from seed: a novel tool to improve the effectiveness and sustainability of seagrass restoration  
*E. Balestri and C. Lardicci*
- 1436 Assembly history alters alpha and beta diversity, exotic-native proportions and functioning of restored prairie plant communities  
*L. M. Martin and B. J. Wilsey*
- 1446 Does managed coastal realignment create saltmarshes with 'equivalent biological characteristics' to natural reference sites?  
*H. L. Mossman, A. J. Davy and A. Grant*

## Urban ecology

- 1457 Conservation challenges in urban seascapes: promoting the growth of threatened species on coastal infrastructures  
*S. Perkol-Finkel, F. Ferrario, V. Nicotera and L. Airoldi*
- 1467 Relative effects of vehicle pollution, moisture and colonization sources on urban lichens  
*H. M. P. Coffey and L. Fahrig*
