

## Reviews

**Review: Strategies to increase nitrogen use efficiency of spring barley**  
Y. Anbessa and P. Juskiw 617-625

**Review: Microsite characteristics influencing weed seedling recruitment and implications for recruitment modeling**  
W. J. Bullied, R. C. Van Acker, and P. R. Bullock 627-650

## Grain

**Yield variability in *Phalaris canariensis* L. due to seeding date, seeding rate and nitrogen fertilizer**  
W. E. May, G. P. Lafond, Y. T. Gan, P. Hucl, C. B. Holzapfel, A. M. Johnston, and C. Stevenson 651-669

**Effects of nitrogen on photosynthetic characteristics of leaves from two different stay-green corn (*Zea mays* L.) varieties at the grain-filling stage**  
G. Li, Z.-S. Zhang, H.-Y. Gao, P. Liu, S.-T. Dong, J.-W. Zhang, and B. Zhao 671-680

**SHORT COMMUNICATION: First report of outcrossing rates in camelina [*Camelina sativa* (L.) Crantz], a potential platform for bioindustrial oils**  
K. D. Walsh, D. M. Puttick, M. J. Hills, R.-C. Yang, K. C. Topinka, and L. M. Hall 681-685

## Forage

**Complexity and composition of pasture swards affect plant productivity and soil organisms**  
M. S. McElroy, Y. A. Papadopoulos, and M. S. Adl 687-697

**Species dynamic, forage yield, and nutritive value of seeded native plant mixtures following grazing**  
M. P. Schellenberg, B. Biligetu, and A. D. Iwaasa 699-706

## Entomology

**Berry unexpected: Nocturnal pollination of lowbush blueberry**  
G. C. Cutler, K. W. Reeh, J. M. Sproule, and K. Ramanaidu 707-711

## Plant Pathology

**Stripe rust resistance among western Canadian spring wheat and triticale varieties**  
H. Randhawa, B. J. Puchalski, M. Frick, A. Goyal, T. Despins, R. J. Graf, A. Laroche, and D. A. Gaudet 713-722

## Weed Science

**Response of dry beans to halosulfuron applied postemergence**  
N. Soltani, C. Shropshire, and P. H. Sikkema 723-728

**The Biology of Canadian weeds. 150 *Erechtites hieraciifolius* (L.) Raf. ex DC.**  
S. J. Darbyshire, A. Francis, A. DiTommaso, and D. R. Clements 729-746

## Application of Technology

**SHORT COMMUNICATION: Organogenesis and somatic embryogenesis in callus derived from HBsAg-transgenic tomato mutant**  
Z.-j. Guan, B. Guo, Y.-l. Huo, Z.-p. Guan, J.-k. Dai, and Y.-h. Wei 747-756

## Other

**Analysis of genotype  $\times$  environment interaction in rain-fed durum wheat of Iran using GGE-biplot and non-parametric methods**  
R. Mohammadi and A. Amri 757-770

**Yield response of potatoes to variable nitrogen management by landform element and in relation to petiole nitrogen – A case study**  
A. P. Moulin, Y. Cohen, V. Alchanatis, N. Tremblay, and K. Volkmar 771-781

**Effect of rate and timing of potassium chloride application on the yield and quality of potato (*Solanum tuberosum* L. 'Russet Burbank')**  
R. M. Mohr and D. J. Tomasiewicz 783-794

**Seeding depth and seeding speed effects on no-till canola emergence, maturity, yield and seed quality**  
K. N. Harker, J. T. O'Donovan, R. E. Blackshaw, E. N. Johnson, G. P. Lafond, and W. E. May 795-802

**SHORT COMMUNICATION: Comparative soil water use by annual crops at a semiarid site in Montana**  
P. R. Miller and J. A. Holmes 803-807

## Cultivar Description

**Transcend Durum wheat**  
A. K. Singh, J. M. Clarke, R. E. Knox, R. M. DePauw, T. N. McCaig, M. R. Fernandez, and F. R. Clarke 809-813
