

CONTENTS

Articles

- Nano-nutrition of chicken embryos. The effect of silver nanoparticles and ATP on expression of chosen genes involved in myogenesis
Filip Sawosz, Lane Pineda, Anna Hotowy, Sławomir Jaworski, Marta Prasek, Ewa Sawosz and André Chwalibog 347
- Effects of inclusion level on nutrient digestibility and energy content of wheat middlings and soya bean meal for growing pigs
Qiang Huang, Xiangshu Piao, Ling Liu and Defa Li 356
- Studies on potential effects of fumaric acid on rumen microbial fermentation, methane production and microbial community
Susanne Riede, Jeannette Boguhn and Gerhard Breves 368
- Using exogenous enzymes to increase the rumen degradability of wheat dried distillers grains with solubles
Zhixiong He, Shuai Ding, Long Xu, Karen Anne Beauchemin and Wenzhu Yang 381
- In situ* degradability and selected ruminal constituents of sheep fed with peanut forage hay
Gisele Machado Fernandes, Rosana Aparecida Possenti, Waldssimiler Teixeira de Mattos, Eliana Aparecida Schammas and Evaldo Ferrari Junior 393
- Effects of dietary supplementation of *Bacillus amyloliquefaciens* CECT 5940 and *Enterococcus faecium* CECT 4515 in adult healthy dogs
Gemma González-Ortiz, Lorena Castillejos, Juan José Mallo, M^a Àngels Calvo-Torras and M^a Dolores Baucells 406
- Incubation of selected fermentable fibres with feline faecal inoculum: correlations between *in vitro* fermentation characteristics and end products
Kristel Rochus, Guido Bosch, Lynn Vanhaecke, Hannelore Van de Velde, Sarah Depauw, Jia Xu, Veerle Fievez, Tom Van de Wiele, Wouter Hendrikus Hendriks, Geert Paul Jules Janssens and Myriam Hesta 416
