

Contents

Simultaneous analysis of 17 diuretics in dietary supplements by HPLC and LC-MS/MS <i>H. Woo, J.W. Kim, K.M. Han, J.H. Lee, I.S. Hwang, J.H. Lee, J. Kim, S.J. Kweon, S. Cho, K.R. Chae, S.Y. Han and J. Kim</i>	209
Authentication of male beef by multiplex fast real-time PCR <i>B. Herrero, L.J. Royo, F.C. Lago, J.M. Vieites and M. Espiñeira</i>	218
Determination of sulfur dioxide in wine using headspace gas chromatography and electron capture detection <i>A. Aberl and M. Coelhan</i>	226
Evaluation and validation of two microbiological tests for screening antibiotic residues in honey according to the European guideline for the validation of screening methods <i>V. Gaudin, A. De Courville, C. Hedou, A. Rault, S.E. Diomandé, C. Creff-Froger and E. Verdon</i>	234
Production of antibodies and development of enzyme-linked immunosorbent assay for valnemulin in porcine liver <i>Z. Wang, N. Li, S. Zhang, H. Zhang, Y. Sheng and J. Shen</i>	244
Application of absolute qPCR as a screening method to detect illicit 17 β -oestradiol administration in male cattle <i>F. Uslenghi, S. Divari, F.T. Cannizzo, R. De Maria, F. Spada, C. Mulasso, M. Pezzolato, E. Bozzetta, A. Attucci, P. Giorgi and B. Biolatti</i>	253
Validation of a recombinant cell bioassay for the detection of (gluco)corticosteroids in feed <i>T.F.H. Bovee, H.H. Heskamp, R.J.R. Helsdingen, A.R.M. Hamers, B.A. Brouwer and M.W.F. Nielen</i>	264
Residue depletion of sulfachlorpyrazine in edible tissues of broiler chickens <i>B. Łebkowska-Wieruszevska and C.J. Kowalski</i>	272
Predicted dietary intake of selenium by the general adult population in Belgium <i>N. Waegeneers, C. Thiry, L. De Temmerman and A. Ruttens</i>	278
Combination of QuEChERS and DLLME for GC-MS determination of pesticide residues in orange samples <i>M. Andrašćiková, S. Hrouzková and S.C. Cunha</i>	286
A robust GC-MS/MS method for the determination of chlorothalonil in fruits and vegetables <i>A. Peruga, M. Barreda, J. Beltrán and F. Hernández</i>	298
Estimation of the uncertainties of extraction and clean-up steps in pesticide residue analysis of plant commodities <i>P. Yolci Omeroglu, Á. Ambrus and D. Boyacioglu</i>	308
Risk assessment of buckwheat flour contaminated by thorn-apple (<i>Datura stramonium</i> L.) alkaloids: a case study from Slovenia <i>L. Perharič, G. Koželj, B. Družina and L. Stanovnik</i>	321
Dioxin congener patterns in commercial catfish from the United States and the indication of mineral clays as the potential source <i>J.K. Huwe and J.C. Archer</i>	331
The effects of temperature and relative humidity on ochratoxin A formation in fresh liquorice root <i>M. Khalesi, M. Tabrizchi and M. Sheikh-Zeinoddin</i>	339
Fate of deoxynivalenol, T-2 and HT-2 toxins and their glucoside conjugates from flour to bread: an investigation by high-performance liquid chromatography high-resolution mass spectrometry <i>E. De Angelis, L. Monaci, M. Pascale and A. Visconti</i>	345
Study of the interaction of deoxynivalenol with human serum albumin by spectroscopic technique and molecular modelling <i>Y. Li, H. Wang, B. Jia, C. Liu, K. Liu, Y. Qi and Z. Hu</i>	356
Relationship between fumonisin production and <i>FUM</i> gene expression in <i>Fusarium verticillioides</i> under different environmental conditions <i>F. Fanelli, A. Iversen, A.F. Logrieco and G. Mulè</i>	365
Contamination of barley seeds with <i>Fusarium</i> species and their toxins in Spain: an integrated approach <i>J. Gil-Serna, E.M. Mateo, M.T. González-Jaén, M. Jiménez, C. Vázquez and B. Patiño</i>	372
A simple and reliable liquid chromatography-tandem mass spectrometry method for the determination of aflatoxin M ₁ in milk <i>A. Biancardi, R. Piro, C. Dall'asta and G. Galaverna</i>	381

- Preparation of an immunoaffinity column for the clean-up of fermented food samples contaminated with citrinin
D. Zhu, H. Zhang and X. Bing 389
- Effect of relative humidity on the migration of benzophenone from paperboard into the food simulant Tenax[®] and modelling hereof
L.L. Bamikob and J.H. Petersen 395
- Study on the influence of temperature, storage time and packaging type on di-*n*-butylphthalate and di(2-ethylhexyl)phthalate release into packed meals
T. Cirillo, E. Fasano, F. Esposito, E. Del Prete and R. Amodio Cocchieri 403
