

Agricultural and Forest Entomology

Volume 15, Number 4, November 2013

Contents

Review Articles

- 335 Biology and trophic interactions of lucerne aphids
*James M. W. Ryalls, Markus Riegler, Ben D. Moore
and Scott N. Johnson*
- 351 Options for managing chrysomelid leaf beetles in
Australian eucalypt plantations: reducing the
chemical footprint
Jane Elek and Tim Wardlaw

Original Articles

- 366 Does rearing an aphid parasitoid on one host affect
its ability to parasitize another species?
*Erfan K. Vafaie, Sheila M. Fitzpatrick and
Jenny S. Cory*
- 375 Prey-specific foraging tactics in a web-building
spider
*Kelton D. Welch, Kenneth F. Haynes and
James D. Harwood*

- 382 Hedgerows surrounding organic apple orchards in
north-west Spain: potential to conserve beneficial
insects
Marcos Miñarro and Eduardo Prida
- 391 The capacity of conophthorin to enhance the
attraction of two *Xylosandrus* species (Coleoptera:
Curculionidae: Scolytinae) to ethanol and the
efficacy of verbenone as a deterrent
Nicole R. VanDerLaan and Matthew D. Ginzel
- 398 Occurrence of two different development patterns in
Lobesia botrana (Lepidoptera: Tortricidae) larvae
during the second generation
*Francesco Pavan, Chiara Floreani, Paola Barro,
Pietro Zandigiacomo and Laura Dalla Montà*
