Primary Research Articles

- 3245 **Finding the appropriate variables to model the distribution of vector-borne parasites with different environmental preferences: climate is not enough**
Antón Pérez-Rodríguez, Sofía Fernández-González, Iván de la Hera and Javier Pérez-Tris
- 3254 **Invasion, establishment, and range expansion of two parasitic nematodes in the Canadian Arctic**
Susan J. Kutz, Sylvia Checkley, Guilherme G. Verocai, Mathieu Dumond, Eric P. Hoberg, Rod Peacock, Jessica P. Wu, Karin Orsel, Karin Seegers, Amy L. Warren and Arthur Abrams
- 3263 **Linking climate change to population cycles of hares and lynx**
Chuan Yan, Nils Chr. Stenseth, Charles J. Krebs and Zhibin Zhang
- 3272 **Increased temperature reduces herbivore host-plant quality**
Stephanie S. Bauerfeind and Klaus Fischer
- 3283 **Linking El Niño, local rainfall, and migration timing in a tropical migratory species**
Allison K. Shaw and Kathryn A. Kelly
- 3291 **Gimme shelter – the relative sensitivity of parasitic nematodes with direct and indirect life cycles to climate change**
Péter K. Molnár, Andrew P. Dobson and Susan J. Kutz
- 3306 **Symbiotic specificity, association patterns, and function determine community responses to global changes: defining critical research areas for coral-*Symbiodinium* symbioses**
Nicholas S. Fabina, Hollie M. Putnam, Erik C. Franklin, Michael Stat and Ruth D. Gates
- 3317 **Larval carry-over effects from ocean acidification persist in the natural environment**
Annaliese Hettinger, Eric Sanford, Tessa M. Hill, Elizabeth A. Lenz, Ann D. Russell and Brian Gaylord
- 3327 **Combined effects of global climate change and regional ecosystem drivers on an exploited marine food web**
Susa Niiranen, Johanna Yletyinen, Maciej T. Tomczak, Thorsten Blenckner, Olle Hjerne, Brian R. MacKenzie, Bärbel Müller-Karulis, Thomas Neumann and H. E. Markus Meier
- 3343 **Probabilistic accounting of uncertainty in forecasts of species distributions under climate change**
Seth J. Wenger, Nicholas A. Som, Daniel C. Dauwalter, Daniel J. Isaak, Helen M. Neville, Charles H. Luce, Jason B. Dunham, Michael K. Young, Kurt D. Fausch and Bruce E. Rieman
- 3355 **Assessing physiological tipping point of sea urchin larvae exposed to a broad range of pH**
Narimane Dorey, Pauline Lançon, Mike Thorndyke and Sam Dupont
- 3368 **Direct and indirect effects of elevated atmospheric CO₂ on net ecosystem production in a Chesapeake Bay tidal wetland**
John E. Erickson, Gary Peresta, Kathryn J. Montovan and Bert G. Drake
- 3379 **Responses of aquatic macrophyte cover and productivity to flooding variability on the Amazon floodplain**
Thiago S. F. Silva, John M. Melack and Evelyn M. L. M. Novo
- 3390 **Gender specific patterns of carbon uptake and water use in a dominant riparian tree species exposed to a warming climate**
Kevin R. Hultine, Kelley G. Burtch and James R. Ehleringer

Contents (*continued*)

- 3406 **Invasion of Old World *Phragmites australis* in the New World: precipitation and temperature patterns combined with human influences redesign the invasive niche**
Wen-Yong Guo, Carla Lambertini, Xiu-Zhen Li, Laura A. Meyerson and Hans Brix
- 3423 **Response of an old-growth tropical rainforest to transient high temperature and drought**
Carlos E. Silva, James R. Kellner, David B. Clark and Deborah A. Clark
- 3435 **Lasting effects of climate disturbance on perennial grassland above-ground biomass production under two cutting frequencies**
Marine Zwicke, Giorgio A. Alessio, Lionel Thiery, Robert Falcimagne, René Baumont, Nicolas Rossignol, Jean-François Soussana and Catherine Picon-Cochard
- 3449 **Plant response to climate change along the forest-tundra ecotone in northeastern Siberia**
Logan T. Berner, Pieter S. A. Beck, Andrew G. Bunn and Scott J. Goetz
- 3463 **Greater phenological sensitivity to temperature on higher Scottish mountains: new insights from remote sensing**
Daniel S. Chapman
- 3472 **Compositional shifts in Costa Rican forests due to climate-driven species migrations**
Kenneth J. Feeley, Johanna Hurtado, Sassan Saatchi, Miles R. Silman and David B. Clark
- 3481 **Negative effects of climate warming on maize yield are reversed by the changing of sowing date and cultivar selection in Northeast China**
Zhijuan Liu, Kenneth G. Hubbard, Xiaomao Lin and Xiaoguang Yang
- 3493 **Making predictions of mangrove deforestation: a comparison of two methods in Kenya**
Alasdair J. R. Rideout, Neha P. Joshi, Karin M. Viergever, Mark Huxham and Robert A. Briers
- 3502 **Carbon dynamics in the future forest: the importance of long-term successional legacy and climate–fire interactions**
E. Louise Loudermilk, Robert M. Scheller, Peter J. Weisberg, Jian Yang, Thomas E. Dilts, Sarah L. Karam and Carl Skinner
- 3516 **A large proportion of North American net ecosystem production is offset by emissions from harvested products, river/stream evasion, and biomass burning**
David P. Turner, Andrew R. Jacobson, William D. Ritts, Weile L. Wang and Ramakrishna Nemani
- 3529 **Soil–plant N processes in a High Arctic ecosystem, NW Greenland are altered by long-term experimental warming and higher rainfall**
Sean M. Schaeffer, Elizabeth Sharp, Joshua P. Schimel and Jeffery M. Welker
- 3540 **Diatoms can be an important exception to temperature–size rules at species and community levels of organization**
Georgina L. Adams, Doris E. Pichler, Eileen J. Cox, Eoin J. O’Gorman, Alex Seeney, Guy Woodward and Daniel C. Reuman
- 3553 **Contrasting responses of heterotrophic and autotrophic respiration to experimental warming in a winter annual-dominated prairie**
Dejun Li, Xuhui Zhou, Liyou Wu, Jizhong Zhou and Yiqi Luo
