

2013 SPRING MEETING OF THE WPSA UK BRANCH

Oral communications, invited talks and posters presented at the WPSA UK Branch Meeting held at Nottingham University on 16–17 April, 2013. These summaries have been edited for clarity and style by the WPSA UK Programme Committee and the Editors of British Poultry Science, but have not been fully peer-reviewed.

- O. A. Olukosi and F. Fru.* Broiler response to phytase supplementation at regular or high dosage is dependent on dietary calcium to phosphorus ratio and dietary correction for nutrient matrix values for phytase. 1
- S. Pace, H. Masey O'Neill and H. Miller.* Effect of glucanase and phytase on laying hen performance. 2
- F. Khattak and R. M. Bold.* Effect of *Buttiauxella* phytase on performance, nutrient retention and ileal digestibility of the young turkey poult. 3
- E. L. O'Reilly, R. J. Burchmore, P. D. Eckersall and N. H. C. Sparks.* The effect of microbial challenge on the intestinal proteome of broiler chickens. 5
- O. A. Olukosi, L. Beeson, V. Pirgozliev and A. Smith.* Supplementation of a monocomponent *Bacillus licheniformis* protease improved growth performance and selectively improved nutrient digestibility in broilers. 6
- R. L. R. Hill.* How do antibiotics work and how does resistance develop? 7
- J. Apajalahti and H. Kettunen.* Are healthy and energy-efficient intestinal microbiotas mutually exclusive? 8
- D. Dring.* The practical challenges presented by a reduction in the use of therapeutic antimicrobials and where research could help. 9
- S. G. Mackenzie, I. Leinonen, A. G. Williams, M. Hazzledine and I. Kyriazakis.* Accounting for environmental impact when formulating UK standard broiler diets. 10
- N. K. Morgan, D. V. Scholey, M. R. Bedford and E. J. Burton.* Minimising the number of birds used for digestibility measures in the pre-starter period in broiler chicks. 12
- M. Syvret, H. Lea and E. J. Burton.* The effects of three types of dietary supplement on digestive enzyme activity in broilers. 13
- F. Khattak, O. Olukosi, M. Brebels, L. Thijs and M. Di Benedetto.* Can multi-enzyme complexes improve turkey growth performance? 14
- D. V. Scholey, P. E. V. Williams and E. J. Burton.* Effect of carbohydrase enzymes on digesta viscosity of broiler chicks fed graded levels of a yeast protein concentrate. 16
- O. S. Iyasere, J. H. Guy, M. Bateson and M. Mitchell.* Impact of short-term heat stress on the welfare of broiler chickens. 17
- S. M. Reid, B. Al-Adhadh, S. C. Essen, R. Manvell, R. Focosi-Snyman, J. Errington, R. M. Irvine and I. H. Brown.* Co-circulation of variant infectious bronchitis and H9 low pathogenicity avian influenza viruses in commercial poultry in multiple regions of Iraq. 18
- N. Samat, I. Kuehn, C. Walk and H. Miller.* Effects of fat and phytase supplementation on growth performance of young broiler chickens. 19
- M. O. Abioja, O. A. Osinowo and J. A. Abiona.* Rectal temperature and respiratory rate of broiler chickens offered water of different temperature at market age. 20
- J. E. Hopkins, D. E. F. McKeegan, J. Sparrey and V. Sandilands.* Humane mechanical methods for killing poultry – designing four mechanical devices and testing their efficacy on cadavers. 22

<i>P. A. Parrott, K. E. Walley and P. R. Custance.</i> Consumer views, values and purchase behaviour on the production and marketing of poultry meat and eggs in the United Kingdom.	23
<i>I. Zahoor, D.-J. De Koning and P. Hocking.</i> Genetics of pH in chicken meat.	24
<i>O. S. Iyasere, J. H. Guy and M. Bateson.</i> Attempts to alleviate moderate heat stress in broiler chickens through provision of additional drinker space.	25
<i>I. Leinonen, A. G. Williams and I. Kyriazakis.</i> Do welfare-enhancing changes in poultry systems affect their environmental impact?	27
<i>L. Piddock.</i> Antibiotic resistance.	28
<i>S. A. Lister.</i> Practical antibiotic stewardship in the UK poultry industry.	28
<i>D. C. Barrett.</i> Practical antibiotic stewardship in the UK dairy industry.	30
<i>F. Karadas, A. Beccaccia, V. Pirgozliev, S. P. Rose, D. Dimitrov and D. Bravo.</i> Dietary essential oils improve hepatic vitamin E concentration of chickens reared on recycled litter.	31
<i>A. Adebisi, A. Amerah and O. Olukosi.</i> Determination of the metabolisable energy of wheat distillers-dried grains with solubles without or with an admixture of xylanase, amylase and protease for broiler chickens using the regression method.	32
<i>N. Bello Rano, A. S. Chaudhry and S. A. Edwards.</i> Effect of wheat distillers' dried grains with solubles supplemented with enzyme on carcass characteristics and digestive organs of broiler chickens.	34
<i>G. A. White and J. Wiseman.</i> Assessment of egg quality and gut environment of layer hens fed diets formulated with varying levels of wheat distillers dark grains with solubles (W-DDGS).	35
<i>A. Beccaccia, V. Pirgozliev, S. P. Rose, O. Oduguwa and D. Dimitrov.</i> Carcass energy retention in chickens determined by two different approaches.	36
<i>B. Makanjuola, O. Obi, T. Olorunghobunmi, M. Oladele-Bukola and D. Morakinyo.</i> Effect of replacing antibiotics with an acidifier on the performance and gut health of broilers.	37
<i>M. Fathi, M. Fahmy, I. Al-Homidan and A.-R. Al-Moshawah.</i> Egg quality aspects of Saudi and White Leghorn laying hens with special reference to eggshell strength.	39
<i>A. O. Onakomaiya and O. S. Akinola.</i> Effect of wet and fermented feeding on growth performance of broiler chickens.	40
<i>F. Khattak, M. A. Shahzad, G. Saleem and T. N. Pasha.</i> Comparative evaluation of commercially available supplementary sources of inorganic phosphorus in broiler feed.	41
<i>L. I. Chielo, J. J. Cooper and T. Pike.</i> Ranging behaviour of laying hens under commercial free range conditions.	42
<i>A. O. Oso, A. O. Bamgbose, O. O. Oduguwa, V. Pirgozliev, O. M. O. Idowu, M. Adebayo, O. Akapo, F. O. Oke and A. O. Lala.</i> Effect of dietary inclusion of whole and peeled cassava root on performance, hydrocyanide intake and serum thiocyanate of turkey poults.	44
<i>F. R. Lawal, A. V. Jegede, O. O. Oduguwa, K. O. Bello, O. L. Ajayi, Y. A. Adebisi, V. Pirgozliev and S. P. Rose.</i> Growth response of broiler chickens fed diets supplemented with neem leaf (<i>Azadirachta Indica</i>) and ginger (<i>Zingiber Officinale</i>) in feed.	45
<i>H. Imrie, A. Taylor and H. Miller.</i> How does dominance hierarchy and time of day influence behaviour and cage usage of layer hens in small groups?	46
<i>A. Al-Mutiri, A. Zaki and I. Al-Homidan.</i> Influence of probiotics supplementation on growth performance and immune response in broiler chicks.	48
