

WEED RESEARCH

Methods

- 399 *Y I Kaiser, A Menegat & R Gerhards* Chlorophyll fluorescence imaging: a new method for rapid detection of herbicide resistance in *Alopecurus myosuroides*

Original Articles

- 407 *J J Nairn, W A Forster & R M van Leeuwen* 'Universal' spray droplet adhesion model – accounting for hairy leaves
- 418 *R G Belz & H P Piepho* Variability of hormetic dose responses of the antiauxin PCIB on *Lactuca sativa* in a plant bioassay
- 429 *Y Yamada, T Tominaga & T Ohsako* Microsatellite variability of sulfonylurea-resistant and susceptible populations of *Schoenoplectus juncooides* (Cyperaceae) in Kinki, Japan
- 440 *T M Tseng, N R Burgos, V K Shivrain, E A Alcober & A Mauromoustakos* Inter- and intrapopulation variation in dormancy of *Oryza sativa* (weedy red rice) and allelic variation in dormancy-linked loci
- 452 *S Demirbas, K E Vlachonasios, O Acar & A Kaldis* The effect of salt stress on *Arabidopsis thaliana* and *Phelipanche ramosa* interaction
- 461 *B Melander, M Nørremark & E F Kristensen* Combining mechanical rhizome removal and cover crops for *Elytrigia repens* control in organic barley systems
- 470 *J Pino, X Arnan, A Rodrigo & J Retana* Post-fire invasion and subsequent extinction of *Conyza* spp. in Mediterranean forests is mostly explained by local factors
- 479 *J M Osca* Expansion of *Leptochloa fusca* ssp. *uninervia* and *Leptochloa fusca* ssp. *fascicularis* in rice fields in Valencia, eastern Spain
- 489 *M Kolářová, L Tyšer & J Soukup* Impact of site conditions and farming practices on the occurrence of rare and endangered weeds on arable land in the Czech Republic
- 499 Reviewers for Weed Research
