

**Original articles**

- 1007–1014 **Effect of parenteral administration of glutamine on autophagy of liver cell and immune responses in weaned calves**  
Z. Y. Hu; H. W. Su; S. L. Li; Z. J. Cao
- 1015–1021 **Splanchnic net balance of oxygen and metabolites in response to a discontinuous mesenteric vein infusion of ammonium in sheep**  
M. I. Recavarren; G. D. Milano
- 1022–1029 **Effects of feeding pistachio by-products silage on growth performance, serum metabolites and urine characteristics in Holstein male calves**  
P. Shakeri; A. Riasi; M. Alikhani; H. Fazaeli; G. R. Ghorbani
- 1030–1035 **Food transit time, nutrient digestibility and nitrogen retention in farmed and feral American mink (*Neovison vison*) – a comparative analysis**  
A. Gugolek; D. Zalewski; J. Strychalski; M. Konstantynowicz
- 1036–1042 **Effects of different dietary protein levels and DL-methionine supplementation on hair growth and pelt quality in mink (*Neovison vison*)**  
H. H. Zhang; Q. K. Jiang; W. L. Sun; C. Xu; B. Cong; F. H. Yang; G. Y. Li
- 1043–1050 **Suitability of live yeast addition to alleviate the adverse effects due to the restriction of the time of access to feed in sheep fed only pasture**  
A. Pérez-Ruchel; J. L. Repetto; C. Cajarville
- 1051–1058 **Effect of concentration and addition method of glycerol on the quality of cryopreserved mithun (*Bos frontalis*) spermatozoa**  
K. K. Baruah; A. Dhali; A. Mech; B. Bora; J. Das; R. Bora; M. Mondal; B. C. Sarmah; B. C. Deka; C. Rajkhiowa
- 1059–1065 **Consumption of bee pollen affects rat ovarian functions**  
A. Kolesarova; Z. Bakova; M. Capcarova; B. Galik; M. Juracek; M. Simko; R. Toman; A. V. Sirotkin
- 1066–1074 **Characterization of the nutritive value of tropical legume grains as alternative ingredients for small-scale pork producers using in vitro enzymatic hydrolysis and fermentation**  
J. Torres; L. S. Muñoz; M. Peters; C. A. Montoya
- 1075–1083 **Physiological responses of dietary tryptophan fed *Labeo rohita* to temperature and salinity stress**  
M. S. Akhtar; A. K. Pal; N. P. Sahu; A. Ciji; D. K. Meena; P. Das
- 1084–1090 **Rumen-protected methionine supplementation and fibre production in alpacas (*Vicugna pacos*)**  
K. E. Moore; S. K. Maloney; J. L. Vaughan; J. T. B. Milton; D. Blache
- 1091–1103 **Feeding untreated and pasteurized waste milk and bulk milk to calves: effects on calf performance, health status and antibiotic resistance of faecal bacteria**  
V. Aust; K. Knapstein; H.-J. Kunz; H. Kaspar; J. Wallmann; M. Kaske
- 1104–1113 **Effect of non-starch-polysaccharide-degrading enzymes as feed additive on the rumen bacterial population in non-lactating cows quantified by real-time PCR**  
J. O. Zeitz; P. Guertler; M. W. Pfaffl; R. Eisenreich; S. Wiedemann; F. J. Schwarz
- 1114–1124 **Colostrogenesis: candidate genes for IgG<sub>1</sub> transcytosis mechanisms in primary bovine mammary epithelial cells**  
A. Stark; E. Vachkova; O. Wellnitz; R. Bruckmaier; C. Baumrucker
- 1125–1131 **Alternate-day fasting diet improves fructose-induced insulin resistance in mice**  
M. Beigy; S. Vakili; S. Berijani; M. Aminizade; M. Ahmadi-Dastgerdi; R. Meshkani
- 1132–1141 **Identification of suitable housekeeping genes for normalization of quantitative real-time PCR data during different physiological stages of mammary gland in riverine buffaloes (*Bubalus bubalis*)**  
J. Aggarwal; A. Sharma; A. Kishore; B. P. Mishra; A. Yadav; A. Mohanty; M. Sodhi; R. S. Kataria; D. Malakar; M. Mukesh
- 1142–1151 **Response of plasma fatty acid profiles to changes in dietary n-3 fatty acids and its correlation with erythrocyte fatty acid profiles in dogs**  
K. Stoeckel; L. Bachmann; G. Dobeleit; H. Fuhrmann
- 1152–1160 **Effect of ensiling moist field bean (*Vicia faba*), pea (*Pisum sativum*) and lupine (*Lupinus* spp.) grains on the contents of alkaloids, oligosaccharides and tannins**  
A. Gefrom; E. M. Ott; S. Hoedtke; A. Zeyner
- 1161–1169 **Effects of replacing dietary starch with neutral detergent-soluble fibre on ruminal fermentation, microbial synthesis and populations of ruminal cellulolytic bacteria using the rumen simulation technique (RUSITEC)**  
X. H. Zhao; C. J. Liu; Y. Liu; C. Y. Li; J. H. Yao
- 1170–1178 **Elevated cyclin D1 expression is governed by plasma IGF-1 through Ras/Raf/MEK/ERK pathway in rumen epithelium of goats supplying a high metabolizable energy diet**  
J. Lu; H. Zhao; J. Xu; L. Zhang; L. Yan; Z. Shen
- 1179–1188 **Relationships between body weight, fasting blood glucose concentration, sex and age in tree shrews (*Tupaia belangeri chinensis*)**  
X. Wu; Q. Chang; Y. Zhang; X. Zou; L. Chen; L. Zhang; L. Lv; B. Liang
