

International and Multidisciplinary Journal

Volume 4 · Number 2

Printed August 2013

Salama NKG, Rabe B

REVIEW: Developing models for investigating the environmental transmission of disease-causing agents within open-cage salmon aquaculture 91–115

Filgueira R, Grant J, Stuart R, Brown MS

Ecosystem modelling for ecosystem-based management of bivalve aquaculture sites in data-poor environments 117–133

Özgül A, Angel D

Wild fish aggregations around fish farms in the Gulf of Aqaba, Red Sea: implications for fisheries management and conservation 135–145

Wang X, Andresen K, Handå A, Jensen B, Reitan KI, Olsen Y

Chemical composition and release rate of waste discharge from an Atlantic salmon farm with an evaluation of IMTA feasibility 147–162

Cranford PJ, Reid GK, Robinson SMC

AS WE SEE IT: Open water integrated multi-trophic aquaculture: constraints on the effectiveness of mussels as an organic extractive component 163–173

Guyondet T, Sonier R, Comeau LA

Spatially explicit seston depletion index to optimize shellfish culture 175–186

Broch OJ, Ellingsen IH, Forbord S, Wang X, Volent Z, Alver MO, Handå A, Andresen K, Slagstad D, Reitan KI, Olsen Y, Skjermo J

Modelling the cultivation and bioremediation potential of the kelp *Saccharina latissima* in close proximity to an exposed salmon farm in Norway 187–206
