

Reviews

Review: Mammary development in swine: effects of hormonal status, nutrition and management
C. Farmer 1-7

Review: Anti-nutritional effects of phytic acid in diets for pigs and poultry – current knowledge and directions for future research
T. A. Woyengo and C. M. Nyachoti 9-21

Welfare, Behaviour and Management

Radio frequency identification technologies for livestock management and meat supply chain traceability
P. Barge, P. Gay, V. Merlino, and C. Tortia 23-33

Thermoregulatory behavior of dairy goats at low temperatures and the use of outdoor yards
K. E. Bøe and R. Ehrlenbruch 35-41

Welfare and carcass and meat quality of pigs being transported for two hours using two vehicle types during two seasons of the year
J. A. Correa, H. W. Gonyou, S. Torrey, T. Widowski, R. Bergeron, T. G. Crowe, J. P. Laforest, and L. Faucitano 43-55

Effects of distillers' dried grains with solubles on behavior of sows kept in a group-housed system with electronic sow feeders or individual stalls
Y. Z. Li, C. E. Phillips, L. H. Wang, X. L. Xie, S. K. Baidoo, G. C. Shurson, and L. J. Johnston 57-66

Breeding and Genetics

Model comparison and estimation of genetic parameters for body weight in commercial broilers
G. Maniatis, N. Demiris, A. Kranis, G. Banos, and A. Kominakis 67-77

Genetic parameters for production and feeding behaviour traits in crossbred steers fed a finishing diet at different ages
O. N. Durunna, F. D. N. Mujibi, D. J. Nkrumah, J. A. Basarab, E. K. Okine, S. S. Moore, and Z. Wang 79-87

Meat Science

Canadian beef tenderness survey: 2001-2011
M. Juárez, I. L. Larsen, M. Klassen, and J. L. Aalhus 89-97

Characterization of Canadian grade standards and lean yield prediction for cows
A. Rodas-González, M. Juárez, W. M. Robertson, I. L. Larsen, and J. L. Aalhus 99-107

Physiology

SHORT COMMUNICATION: Relations between peripartum concentrations of prolactin and progesterone in sows and piglet growth in early lactation
H. Quesnel, P. Ramaekers, H. van Hees, and C. Farmer 109-112

Nonruminant Nutrition

Characterization of whole body compositional growth of male ducks during the twenty-nine day post-hatch period
A. P. Schinckel, M. E. Einstein, K. M. Ajuwon, and O. Adeola 113-122

Ruminant Nutrition

Effects of dietary ruminally degradable starch and ruminally degradable protein levels on urea recycling, microbial protein production, nitrogen balance, and duodenal nutrient flow in beef heifers fed low crude protein diets
K. L. Davies, J. J. McKinnon, and T. Mutsvangwa 123-136

Replacing canola meal as the major protein source with wheat dried distillers' grains alters omasal fatty acid flow and milk fatty acid composition in dairy cows
G. E. Chibisa, D. A. Christensen, and T. Mutsvangwa 137-147

SHORT COMMUNICATION: Erythrocytes assayed early ante mortem can predict adipose tissue and muscle trans-18:1 isomeric profiles of steers fed red clover silage supplemented with flaxseed
C. Mapiye, M. E. R. Dugan, T. D. Turner, D. C. Rolland, J. A. Basarab, V. S. Baron, T. A. McAllister, H. C. Block, B. Uttaro, and J. L. Aalhus 149-153

SHORT COMMUNICATION: Effect of condensed tannin on in vitro ruminal fermentation of purple prairie clover (*Dalea purpurea* Vent)-cool-season grass mixture
L. Jin, Y. Wang, A. D. Iwaasa, Z. Xu, M. P. Schellenberg, Y. G. Zhang, and T. A. McAllister 155-158

Other

Methane emissions from a swine manure tank in western Canada
T. K. Flesch, X. P. C. Vergé, R. L. Desjardins, and D. Worth 159-169

Effects of calf- and yearling-fed beef production systems and growth promotants on production and profitability
O. López-Campos, J. L. Aalhus, E. K. Okine, V. S. Baron, and J. A. Basarab 171-184
