Focus Issue:

Sustainable plant nutrition at the Iberian corner

827

R.M. Belda, D. Mendoza-Hernández, and F. Fornes – Nutrient-rich compost *versus* nutrient-poor vermicompost as growth media for ornamental plant production

836

A. Franco, L. Rufo, N. Rodríguez, R. Amils, and V. de la Fuente – Iron absorption, localization, and biomineralization of *Cynodon dactylon*, a perennial grass from the Río Tinto basin (SW Iberian Peninsula)

843

J.A. Amorós, C. Pérez-de-los Reyes, F.J. García Navarro, S. Bravo, J.L. Chacón, J. Martínez, and R. Jiménez Ballesta – Bioaccumulation of mineral elements in grapevine varieties cultivated in “La Mancha”

851

M. Llugany, R. Tolrà, S.R. Martín, C. Poschenrieder, and J. Barceló – Cadmium-induced changes in glutathione and phenolics of *Thlaspi* and *Noccaea* species differing in Cd accumulation

859

M. Cerdán, A. Sánchez-Sánchez, J.D. Jordá, M. Juárez, and J. Sánchez-Andreu – Effect of commercial amino acids on iron nutrition of tomato plants grown under lime-induced iron deficiency

867

A.M. García-López, M. Avilés, and A. Delgado – Iron availability thresholds for the inoculation of cucumber with *Trichoderma asperellum* T34

876

J.D. Flores-Félix, E. Menéndez, L.P. Rivera, M. Marcos-García, P. Martínez-Hidalgo, P.F. Mateos, E. Martínez-Molina, M. de la Encarnación Velázquez, P. García-Fraile, and R. Rivas – Use of *Rhizobium leguminosarum* as a potential biofertilizer for *Lactuca sativa* and *Daucus carota* crops

Regular Articles

883

B. Ulén, A.K. Eriksson, and A. Etana – Nutrient leaching from clay soil monoliths with variable past manure inputs

892

H. Wullaert, M. Bigalke, J. Homeier, N. Cumbicus, C. Valarezo, and W. Wilcke – Short-term response of the Ca cycle of a montane forest in Ecuador to low experimental CaCl₂ additions

904

S.L. Drahorad and P. Felix-Henningsen – Application of an electronic micropenetrometer to assess mechanical stability of biological soil crusts

910

S. Pätzold, M. Hejzman, J. Barej, and J. Schellberg – Soil phosphorus fractions after seven decades of fertilizer application in the Rengen Grassland Experiment

921

H.R. Motaghian and A.R. Hosseinpour – Evaluation of copper desorption characteristics using DTPA and citric acid for wheat (*Triticum aestivum* L.) rhizosphere of soils amended with sewage sludge

929

Q.-P. Zhou, D.K. Biswas, and B.-L. Ma – Comparisons among cultivars of wheat, hullless and hulled oats: Dry matter, N and P accumulation and partitioning as affected by N supply

942

M. Landi, D. Remorini, A. Pardossi, and L. Guidi – Purple *versus* green-leaved *Ocimum basilicum*: Which differences occur with regard to photosynthesis under boron toxicity?

952

K. Erdle, B. Mistele, and U. Schmidhalter – Spectral assessments of phenotypic differences in spike development during grain filling affected by varying N supply in wheat

964

C. Zörb, K.H. Mühling, M. Hasler, V. Gödde, K. Niehaus, D. Becker, and C.-M. Geilfus – Metabolomic responses in grain, ear, and straw of winter wheat under increasing sulfur treatment

971
