

BRITISH POULTRY SCIENCE

October 2013

CONTENTS

Volume 54, Number 5

BEHAVIOUR, WELFARE & ENVIRONMENT

Sensor-based monitoring of the prevalence and severity of foot pad dermatitis in broiler chickens. *G. Hoffmann, C. Ammon, L. Volkamer, C. Sürle and D. Radko.* 553

GENETICS

Identification of duck *HSP70* gene, polymorphism analysis and tissue expression under control and heat stress conditions. *M. Xia, J. Gan, Q. Luo, X. Zhang and G. Yang.* 562

IMMUNOLOGY, HEALTH & DISEASE

Molecular cloning, expression and association study with reproductive traits of the duck *LRP8* gene. *C. Wang, S.J. Li, C. Li, G.H. Yu, Y.P. Feng, X.L. Peng and Y.Z. Gong.* 567

Supplemental arginine administered *in ovo* or in the feed reduces the susceptibility of broilers to pulmonary hypertension syndrome. *A. Saki, M. Haghghat and F. Khajali.* 575

Diminished gene expression of cardiac heat shock proteins in pulmonary hypertensive chickens. *H. Hassanpour, A. Afzali and S.H. Bahadoran.* 581

MEAT & EGG SCIENCE

Comparison of changes in production and egg composition in relation to *in vivo* estimates of body weight and composition of brown and white egg layers during the first egg-laying period. *E. Szentirmai, G. Milisits, T. Donkó, Z. Budai, J. Ujvári, T. Fülöp, I. Repa and Z. Sütő.* 587

Meat quality and nutritional composition of pheasants (*Phasianus colchicus*) reared in an extensive system. *D. Franco and J.M. Lorenzo.* 594

MODELLING

Modelling changes in the components of eggs from broiler breeders over time. *M.K. Nonis and R.M. Gous.* 603

NUTRITION & METABOLISM

Application of computed tomography to assess the effect of egg yolk ratio on body composition in chickens of different genotype and gender at hatch and during the rearing period. *G. Milisits, T. Donkó, A. Dalle Zotte, A. Sartori, E. Szentirmai, M. Emri, G. Opposits, A. Orbán, O. Pócze, I. Repa and Z. Sütő.* 611

The effect of *Cirsium arvense* extract on antioxidant status in quail. *C. Orhan, N. Sahin, F. Akdemir, R. Markiewicz-Zukowska, M.H. Borawska, V.A. Isidorov, A. Hayirli and K. Sahin.* 620

Effect of fermented moist feed on performance, gut bacteria and gut histo-morphology in broilers. *J.A. Missotten, J. Michiels, N. Dierick, A. Owyn, A. Akbarian and S. De Smet.* 627

Evaluation of probiotics in diets with different nutrient densities on growth performance, blood characteristics, relative organ weight and breast meat characteristics in broilers. *W. Chen, J.P. Wang, L. Yan and Y.Q. Huang.* 635

The efficacy of a standardised product from dried leaves of *Solanum glaucophyllum* as source of 1,25-dihydroxycholecalciferol for poultry. *H. Bachmann, S. Autzen, U. Frey, U. Wehr, W. Rambeck, H. McCormack and C.C. Whitehead.* 642

Influence of a microbial phytase on the performance and the utilisation of energy, crude protein and fatty acids of young broilers fed on phosphorus-adequate maize- and wheat-based diets. *F. Zaefarian, L.F. Romero and V. Ravindran.* 653

PHYSIOLOGY, ENDOCRINOLOGY & REPRODUCTION

Effect of dialysis on the proacrosin/acrosin system and motility of turkey (*Meleagris gallopavo*) spermatozoa during liquid storage. *M. Słowińska, G.J. Dietrich, E. Liszewska, K. Kozłowski, J. Jankowski and A. Ciereszko.* 661
