

CONTENTS

Intercohort density dependence drives brown trout habitat selection <i>D. Ayllón, G.G. Nicola, I. Parra, B. Elvira and A. Almodóvar</i>	1
The role of fleshy pericarp in seed germination and dispersal under flooded conditions in three wetland forest species <i>J.P. Mora, C. Smith-Ramírez and A. Zúñiga-Feest</i>	10
Interplay of succession and seasonality reflects resource utilization in an ephemeral habitat <i>F.X.J. Sladeczek, J. Hrcek, P. Klimes and M. Konvicka</i>	17
Spatio-temporal variation in a seed bank of a semi-arid region in northeastern Brazil <i>K.A. da Silva, D.M. dos Santos, J.M.F.F. dos Santos, U.P. de Albuquerque, E.M.N. Ferraz and E.L. Araújo</i>	25
The occurrence of fig wasps in the fruits of female gynodioecious fig trees <i>T. Wu, D.W. Dunn, H.-Y. Hu, L.-M. Niu, J.-H. Xiao, X.-L. Pan, G. Feng, Y.-G. Fu, D.-W. Huang</i>	33
Forest fire occurrence increases the distribution of a scarce forest type in the Mediterranean Basin <i>X. Arnan, L. Quevedo and A. Rodrigo</i>	39
Diet selection and seasonal dietary switch of a large sexually dimorphic herbivore <i>G. Shannon, R.L. Mackey and R. Slotow</i>	48
